

## Chapter 2

### EARLY SETTLEMENTS

The early 1600s saw the beginning of a great tide of emigration from Europe to North America. Spanning more than three centuries, this movement grew from a trickle of a few hundred English colonists to a flood of millions of newcomers. Impelled by powerful and diverse motivations, they built a new civilization on the northern part of the continent.

The first English immigrants to what is now the United States crossed the Atlantic long after thriving Spanish colonies had been established in Mexico, the West Indies and South America. Like all early travelers to the New World, they came in small, overcrowded ships. During their six- to 12-week voyages, they lived on

meager rations. Many died of disease; ships were often battered by storms and some were lost at sea.

Most European emigrants left their homelands to escape political oppression, to seek the freedom to practice their religion, or for adventure and opportunities denied them at home. Between 1620 and 1635,

economic difficulties swept England. Many people could not find work. Even skilled artisans could earn little more than a bare living. Poor crop yields added to the distress. In addition, the Industrial Revolution had created a burgeoning textile industry, which demanded an ever-increasing supply of wool to keep the looms running. Landlords enclosed farmlands and evicted the peasants in favor of sheep cultivation. Colonial expansion became an outlet for this displaced peasant population.

The colonists' first glimpse of the new land was a vista of dense woods. The settlers might not have survived had it not been for the help of friendly Indians, who taught them how to grow native plants -- pumpkin, squash, beans and corn. In addition, the vast, virgin forests, extending nearly 2,100 kilometers along the Eastern seaboard, proved a rich source of game and firewood. They also provided abundant raw materials used to build houses, furniture, ships and profitable cargoes for export.

Although the new continent was remarkably endowed by nature, trade with Europe was vital for articles the settlers could not produce. The coast served the immigrants well. The whole length of shore provided innumerable inlets and

The Bivocal Nation Nutsa Batiashvili,2017-09-20 This book is about a divided nation and polarized nationhood Its principal purpose is to examine division and polarization as forms of imagining that are configured within culture and framed by history This is what bivocality signifies two distinct discursive voices through which nationhood is articulated voices that are nonetheless grounded in a culturally common symbolic field The volume offers an ethnographically centered analysis of the ways in which Georgians make use of these voices in critical discourses of nationhood By illuminating the cultural semantics behind these discourses Nutsa Batiashvili offers a new constellation of conceptual terms for understanding modern forms of nationalism and nation building in the marginal or liminal landscapes between the Orient and the Occident **Memory and Political Change** A. Assmann,L. Shortt,2011-11-08 Examining the

role of memory in the transition from totalitarian to democratic systems this book makes an important contribution to memory studies It explores memory as a medium of and impediment to change looking at memory s biological cultural narrative and socio psychological dimensions **Equipping Educators to Teach Religious Literacy** Emile Lester,W. Y. Alice Chan,2022-03-17 This volume provides a detailed evaluation of a unique education program implemented in secondary schools in Georgia to enhance teachers religious literacy and their ability to promote this in schools and classrooms The text demonstrates that religious literacy can be proactively taught to students whilst also highlighting key considerations and tensions around religious liberty in the American South Spanning rural urban and suburban Georgia the text presents an original approach to the growing field of religious literacy by foregrounding community voices and perspectives Using rich empirical data and qualitative interviews with religious and political leaders scholars teachers parents and students the book evaluates the challenges efficacy and benefits of the program in view of rising political polarization In doing so the text tackles historical and contemporary issues around race and religion and considers tensions between religious and nonreligious groups in the US Ultimately the book presents a significant contribution to the dialogue around fostering religious literacy in schools This text will benefit researchers academics and educators with an interest in religious education teacher education and religious literacy more broadly Those interested in the sociology of education as well as diversity and

religion in America will also benefit from this volume      Annual Report of the Athens City Schools, Athens, Georgia Athens (Ga.). City Schools,1910      **Hollywood or History?** Scott L. Roberts,Charles J. Elfer,2021-01-01 The challenges of teaching history are acute where we consider the world history classroom Generalized world history courses are a part of many if not most K 12 curricular frameworks in the United States While United States history tends to dominate the scholarship and conversation there are an equally wide number of middle level and secondary students and teachers engaged in the study of world history in our public schools And the challenges are real In the first place if we are to mark content coverage as a curricular obstacle in the history classroom generally then we must underscore that concern in the world history classroom and for obvious reasons The curricular terrain to choose from is immense and forever expanding dealing with the development of numerous civilizations over millennia and across a wide geographic expanse In addition to curricular concerns world historical topics are inherently farther away from most students lives not just temporally but often geographically and culturally Thus the rationale for the present text *Hollywood or History An Inquiry Based Strategy for Using Film to Teach World History* The reviews of the first volume *Hollywood or History An Inquiry Based Strategy for Using Film to Teach United States History* strategy have been overwhelmingly positive especially as it pertains to the application of the strategy for practitioner Classroom utility and teacher practice have remained our primary objectives in developing the *Hollywood or History* strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history We believe that students connection to film along with teachers ability to use film in an effective manner will help alleviate some of the challenges of teaching world history The book provides 30 secondary lesson plans grades 6 12 that address nine eras in world history      *Handbook of the Linguistic Atlas of the Middle and South Atlantic States* William A. Kretzschmar,William A. Kretzschmar Jr.,1993-09-15 Who uses skeeter hawk snake doctor and dragonfly to refer to the same insect Who says gum band instead of rubber band The answers can be found in the *Linguistic Atlas of the Middle and South Atlantic States* LAMSAS the largest single survey of regional and social differences in spoken American English It covers the region from New York state to northern Florida and from the coastline to the borders of Ohio and Kentucky Through interviews with nearly twelve hundred people conducted during the 1930s and 1940s the LAMSAS mapped regional variations in vocabulary grammar and pronunciation at a time when population movements were more limited than they are today thus providing a unique look at the correspondence of language and settlement patterns This handbook is an essential guide to the LAMSAS project laying out its history and describing its scope and methodology In addition the handbook reveals biographical information about the informants and social histories of the communities in which they lived including primary settlement areas of the original colonies Dialectologists will rely on it for understanding the LAMSAS and historians will find it valuable for its original historical research Since much of the LAMSAS questionnaire concerns rural terms the data collected from the interviews can pinpoint such language differences as those

between areas of plantation and small farm agriculture For example LAMSAS reveals that two waves of settlement through the Appalachians created two distinct speech types Settlers coming into Georgia and other parts of the Upper South through the Shenandoah Valley and on to the western side of the mountain range had a Pennsylvania influenced dialect and were typically small farmers Those who settled the Deep South in the rich lowlands and plateaus tended to be plantation farmers from Virginia and the Carolinas who retained the vocabulary and speech patterns of coastal areas With these revealing findings the LAMSAS represents a benchmark study of the English language and this handbook is an indispensable guide to its riches
