The Map of Africa by Treaty Sir Edward Hertslet, 1909 *Annales* France. Assemblée nationale (1871-1942). Chambre des députés, 1902 The Conte Du Graal Cycle Thomas Hinton, 2012 A new study of the continuations to Chr tien s Conte du Graal shows their crucial influence on the development of Arthurian literature Chr tien de Troyes s late twelfth century Conte du Graal has inspired writers and scholars from the moment of its composition to the present day The challenge represented by its unfinished state was quickly taken up and over the next fifty years the romance was supplemented by a number of continuations and prologues which eventually came to dwarf Chr tien s text In one of the first studies to treat the Conte du Graal and its continuations as a unified work Thomas Hinton considers the whole corpus as a narrative cycle Through a combination of close textual readings and manuscript analysis the author argues that the unity of the narrative depends on a balanced tension between centripetal and centrifugal dynamics He traces how the authors scribes and illuminators of the cycle worked to produce coherence even as they contended with potentially disruptive forces multiple authorship differences of intention and changes in the relation between text audience and book Finally he tackles the long held orthodoxy that places the Perceval Continuations on the margins of literary history Widening the scope of enquiry to consider the corpus s influence on thirteenth century verse romances this study re situates the Conte du Graal cycle as a vital element in the evolution of Arthurian literature Thomas Hinton is Junior Research Fellow in Modern Languages at Jesus College Oxford

Assemblée nationale (1871-1942). Chambre des députés, 1895 **Pragmatic Markers and Pragmaticalization** Peter Lauwers, Gudrun Vanderbauwhede, Stijn Verleyen, 2012-10-31 This volume brings together five papers offering cross linguistic analyses of pragmatic markers involving modality supplemented by three book reviews on the same topic The contrastive method based on monolingual or translation corpora does not only provide interesting insights about differences with respect to the semantics and the formal encoding of semantics between cognate elements in different languages but also appears to be a very useful tool to refine the semantic analysis of markers within a given language The reader will also discover among the results of the original empirical research collected in this volume insights that contribute to typological and theoretical issues surrounding pragmatic markers such as the bottom up identification of cross linguistic pragmatic or discourse functions the establishment of semantic maps and the formulation of hypotheses about implicational hierarchies in

the diachronic development of pragmatic markers on the basis of synchronic evidence especially in the framework of grammaticalization pragmaticalization theory This volume was originally published as a special issue of Languages in Contrast 10 2 2010 Annales du Sénat France.
