

We're Ready to Layer

Figure 11 shows view of head from above with the sections. You can see where you start:

1. Take some hair from just next to and beneath the crown (#1). Lift hair up, holding it firmly between your fingers. See figure 12. Cut hair leaving 4-4 1/2" inches (10cm) of length. Figure 13 shows finished cut for this first upper-most hair section.

Figure 11

Figures 12 & 13

2. Now take a small part of the hair (the lowest hairs) you've just cut together with the next section of hair, just below. The hairs from the first section are your guideline for the length, for this second section you keep the same length for the cut. See figure 15. Fig. 14 shows safe cutting.
3. Once again you take a few hairs from the lowest part of the last section you've cut and continue cutting the next sections in similar way. However, once you've past the round part of the skull, you'll begin to leave less and less length when you cut the hair. See figure 16.

You should end at the last section right by the neck, so it blends-in with the rest of the hair nearby.

Figure 17 (on next page) shows you the result of cutting the middle of the (back of) head layer.
