In Colorado, 2,897 fourth grade students in 122 public schools participated in the reading assessment. The sample of students was directly representative of 95% of the eligible student population in participating schools in Colorado. Data were summarized on the NAEP reading proficiency scale ranging from 0 to 500 and results were reported according to three achievement levels at each grade: basic, proficient, and advanced. Major findings were that 1) the overall average proficiency of the students was 218, about the same as that of students across the nation (216); 2) the lowest performing 10% of the fourth graders had proficiency levels below 175, while the top 10% of the fourth graders had proficiency levels above 257; 3) 60% were at or above the basic level, 22% were at or above the proficient level, and 4% were at or above the advanced level; 4) White students demonstrated higher proficiency than did Black, Hispanic, or American Indian students, but about the same as did Asian students; 5) boys had a lower average reading proficiency than girls; and 6) 70% of the students were taught by teachers who placed heavy emphasis on the integration of reading and writing.
