British Naval Intelligence through the Twentieth Century Andrew Boyd, 2020-08-30 This is the first comprehensive account of how intelligence influenced and sustained British naval power from the mid nineteenth century when the Admiralty first created a dedicated intelligence department through to the end of the Cold War It brings a critical new dimension to our understanding of British naval history in this period while setting naval intelligence in a wider context and emphasising the many parts of the British state that contributed to naval requirements It is also a fascinating study of how naval needs and personalities shaped the British intelligence community that exists today and the concepts and values that underpin it The author explains why and how intelligence was collected and assesses its real impact on policy and operations It confirms that naval intelligence was critical to Britain's survival and ultimate victory in the two World Wars but significantly reappraises its role highlighting the importance of communications intelligence to an effective blockade in the First and according Ultra less dominance compared to other sources in the Second It reveals that coverage of Germany before 1914 and of the three Axis powers in the interwar period was more comprehensive and effective than previously suggested and while British power declined rapidly after 1945 the book shows how intelligence helped the Royal Navy to remain a significant global force for the rest of the twentieth century and in submarine warfare especially in the

second half of the Cold War to achieve influence and impact for Britain far exceeding resources expended This compelling new history will have wide appeal to all readers interested in intelligence and its crucial impact on naval policy and operations **Designing Mobility and Transport Services** Mike Tovey, Andree Woodcock, Jane Osmond, 2016-11-10

European cities increasingly face problems caused by transport and traffic For many people transport provision is unsatisfactory and current arrangements are leading to a deteriorating environment A fundamental problem is that our currently fragmented approach makes it difficult to understand fully the circumstances and needs of transport users In any overall approach public transport is a crucial component Designing Mobility and Transport Services shows how these issues can be addressed and resolved The development of an inclusive validated passenger experience measurement instrument is the first step in understanding the situation and thus tackling it It is needed if we are to create high quality user centred integrated accessible public transport services which are capable of attracting and retaining public transport users whilst meeting sustainability targets The METPEX research project was devised to tackle these issues Coordinated by Coventry University the METPEX consortium brought together 16 European partners from 12 countries The project s underlying rationale was the proposition that if transport operators and authorities were provided with a robust reliable and tailorable means of measuring the whole multimodal passenger journey they could improve service provision The book describes how such an improvement can be achieved to attract travellers out of their private vehicles thereby reducing congestion and pollution and increasing health and well being It provides a template for a creative approach and a meta design narrative in designing for transport systems to enhance mobility choices by improving the door to door journey and thus underpin sustainable transport initiatives **Residential Schools and Reconciliation** J.R. Miller, 2017-10-03 Since the 1980s successive

Canadian institutions and federal governments as well as Christian churches have attempted to grapple with the malignant legacy of residential schooling through official apologies the Royal Commission on Aboriginal Peoples the Indian Residential Schools Settlement Agreement and the Truth and Reconciliation Commission TRC In Residential Schools and Reconciliation award winning author J R Miller tackles and explains these institutional responses to Canada s residential school legacy Analysing archival material and interviews with former students politicians bureaucrats church officials and the Chief Commissioner of the TRC Miller reveals a major obstacle to achieving reconciliation the inability of Canadians at large to overcome their flawed overly positive understanding of their country s history This unique timely and provocative work asks Canadians to accept that the root of the problem was Canadians like them in the past who acquiesced to aggressively assimilative policies **Spaces of Responsibility** Diana Ayeh, 2021-09-20 Spaces of Responsibility explores the role of ethics in re ordering extractive relations under the global condition Through an empirical investigation of actors places and ideas in and around Burkina Faso s industrial gold mining sector this volume carries out an anti essentialist yet critical examination offering new insights into global mining capitalism Corporate concession making practices the implementation of national

mining legislation and civil society interventions in mining areas all contribute in different ways to the dialectics of the global. Accordingly the ongoing territorialization of mining investment often has considerable impacts on the well being of populations in the Global South. At the same time multinational corporations today cannot completely distance or isolate themselves from the political economic and social contexts they are interacting in and with. Drawing on theoretical debates about the links between resource extraction and socio economic development multi scalar negotiations of ethics in mining governance are ethnographically retraced. In terms of gains and benefits these negotiations manifest themselves spatially providing access for some actors while excluding others.

Chinese and Global Financial Integration through Stock Connect Flora Huang, 2023-10-19 This significant and timely book explores a novel market mechanism, Stock Connect, which gives mutual market access to Chinese and international investors and provides original analyses and fresh insights. This mechanism could become the new normal in future global financial integration. By examining this cross border scheme from a regulatory perspective via a three tiered analytical framework, investors, issuers and regulators, this book unearths the profound implications of Stock Connect to local and global financial markets and the legal impediments to its implementation. It covers a broad range of topics in this cross boundary investment channel including an overview of four existing connectivity arrangements: Shanghai-Hong Kong, Shenzhen-Hong Kong, Shanghai-London and China-Switzerland, the uniqueness of these connectivity arrangements, investor protection, regulations of connect issuers, regulatory cooperation and enforcement, the impacts on local and global financial markets, the implications for the world market connectivity as well as the challenges and future of Stock Connect. This pioneering study will appeal to a broad range of readers who are interested in the on going reshaping of international financial systems and China's emerging influence in the international financial order.
