

Exif Print
(Exif version 2.2)

about Exif Print

Exif Print (Exchangeable Image File Format 2.2) is an international open-standard that simplifies digital imaging and enhances printed photographs. When a photograph is taken with a digital camera, Exif Print encodes information such as exposure time, flash setting, and color saturation, and tags it in the standard header of a JPEG file. The HP Deskjet printer software then uses the tags to automatically perform image-specific enhancements. Users do not have to further manipulate the image to get outstanding photographs. Exif Print is available with most newer digital cameras.

Exif Print printing requirements

Printing Exif Print-enhanced photos requires:

- A digital camera that supports Exif Print
