User's Guide for the CREAMS Computer Modes, 1984 **A User's Guide to the Meade LXD55 and LXD75**

Telescopes Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55.com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope **Motor Master User Guide**, 1996 Hot Line Farm Equipment Guide Quick Reference Guide, 2008

High Performance Networking VII A. Tantawy,2013-06-05 It is always confusing and perhaps inconvenient at times using generic terms that will mean something to everyone but different things to different people High Performance is one of those terms High Performance can be viewed as synonymous to High Speed or Low Latency or a number of other characteristics The interesting thing is that such ambiguity can sometimes be useful in a world where focus shifts quite easily from one issue to another as times and needs evolve Many things have changed since the first HPN conference held in Aachen Germany in 1987 The focus then was mainly on Media Access Control MAC protocols that allow users to share the high bandwidth of optical fiber FDDI Fiber Distributed Data Interface was making its debut with its amazing 100 Mbps speed ATM Asynchronous Transfer Mode and SONET the Synchronous Optical Network were beginning to capture our imagination What could users possibly do with such high performance Share it After realizing that the real problems had gradually shifted away from the network media to the periphery of the network focus also began to shift Adapter design protocol implementation and communication systems architecture began to attract our interest Networking not Networks became the hot issue

Temperature-Programmed Gas Chromatography Leonid M. Blumberg, 2011-09-22
This book provides a comprehensive up to date overview of temperature programmed gas chromatography (GC). The first part of the book introduces the reader to the basics concepts of GC as well as the key properties of GC columns. The second part describes the mathematical and physical background of GC. In the third part different aspects in the formation of a chromatogram are discussed including retention times, peak spacing and peak widths. An invaluable reference for any chromatographer and analytical chemist, it provides all the answers to questions like: At what temperature does a solute elute in a temperature programmed analysis? What is the value of the retention factor of eluting solute? How wide are the peaks? How large is the time distance between two peaks? How do all these parameters depend on the heating rate?
