Whenever the condition of a store's ambient air is above the design standard of these merchandisers (75°F; 55% relative humidity) a problem of moisture condensing on the merchandiser's exterior back surfaces can occur. To eliminate this problem, air must be forced through the open area behind the merchandiser to "wipe" the surface dry. This kit is designed for that purpose.

This kit is completely factory assembled and ready for installation. All that is required is to fasten it to the top of the merchandiser, connect to an electrical power supply and close-off the open areas at the end of the merchandiser or merchandiser lineup.
