

## The Hydrogen Atom – Student Guide

### Background Material

Carefully read the background pages entitled Energy Levels, Light, and Transitions and answer the following questions to check your understanding.

Question 1: Complete the following table which compares how the Bohr Model and the Quantum model represent the Hydrogen atom. In some cases they both describe things in the same way and in some cases they do not.

| Concept                                          | Bohr Model                              | Quantum Model                           |
|--------------------------------------------------|-----------------------------------------|-----------------------------------------|
| <b>Nucleus</b>                                   | positively charged proton at the center | positively charged proton at the center |
| <b>Electrons</b>                                 |                                         | negatively charged cloud                |
| <b>Orbital</b>                                   |                                         |                                         |
| <b>Location of electron in the first orbital</b> | always located at the Bohr radius       |                                         |
| <b>Energy of the Energy Levels</b>               |                                         | $E = -E_0/n^2$                          |

Question 2: Complete the following table which relates the parameters of two different photons by circling the appropriate relationship. The first row is completed for you: "A red photon has a larger wavelength, smaller frequency, smaller energy, and the same velocity through space as a blue photon".
