The track system for the JD350-C Crawler consists of two tracks mounted on track frame assemblies, piloted by and connected to two fixed crossbars (Fig. 1). The track frame assemblies are fastened to the crossbars to give a fixed gauge setting of 48 inches (1.2 m). The track frame has five track roller assemblies.

A special wide tread track is available for snow operation on crawlers without loaders. Track gauge is fixed at 68 inches (1.7 m).

Each track frame assembly consists of a fixed single unit of welded steel frame which supports the roller assemblies and the front idler wheel with its adjusting mechanism. The assembly is clamped to the fixed crossbars which support the weight of the tractor.
