Kustom Signals Inc Pro Laser Iii Manual:

Florida Administrative Register ,2008-08 *ITS Data Quality* Brian L. Smith,2003 The Virginia Department of Transportation VDOT has made significant investments in the traffic monitoring infrastructure that supports intelligent transportation systems ITS The purpose of this infrastructure is to provide accurate real time information on the status of the transportation system thus it is critical that the monitoring infrastructure provide accurate data Although detectors are usually tested immediately after installation it is well known that they operate in a very harsh environment and thus are susceptible to degradation in accuracy and or complete failure Consequently a long term commitment to data quality assurance is required through maintenance data quality assessment testing and repair replacement The quality of data from ITS applications is becoming increasingly important as the data are more widely used Not only is the data used in real time operations but also in myriad other often more traditional transportation applications The purpose of this research project was to develop a procedure that VDOT could use to assess its ITS data quality The report includes a data quality assessment procedure that is based on theory practice and empirical investigation The procedure has the following key features benchmark data collection using temporary installation of non intrusive detectors data quality assessed at the lane level to pinpoint problem detectors data quality assessed at the 1 minute interval or minimum practical measurement interval level to provide sufficient quantities of data in reasonable periods of time analysis techniques including both measures and plots which provide quantitative and visual indications of data quality The authors recommend that VDOT begin to use the procedure on both an ad hoc basis and in a statewide program as a means of protecting its significant investment in ITS data collection **Florida Administrative Weekly** ,2004 *Procedure for Establishing No Passing Zones* Richard L. Brown,Joseph E. Hummer,1996 *Car and Driver* ,1992 ProLaser 4 Kustom Electronics,2011 *Operator's Manual* ,1982 **Operator's Manual** ,1988 **Pro-Lite+ Reference Manual** Kustom Electronics,2006 **Operating Manual for Ultrashort Pulse Laser System-II (1060 Nm Operation).** ,1997 This report describes the ultrashort pulse laser system USP II installed in the research laboratory and which is comprised of components manufactured by both Spectra Physics and Coherent Laser Group This laser system uses state of the art laser technology to provide very high energy single pulses in the visible and near IR spectra for pulsewidths near 100 femtoseconds This report describes in detail the turn on and operating procedures so that the system operator can bring it up to specification and fine tune the subsystems to give optimum pulsewidth and energy pulse outputs The basic system has been configured to operate on a single 4 by 12 ft optical bench with some diagnostic instruments permanently mounted to the table The major subsystems which comprise the USP II are described briefly as to their operating characteristics and how the output characteristics of each unit affects the output of the following unit This report is not designed to replace the operating procedures of each subsystem but rather to describe how the complete system works in unison Each subsystem is described in the same order as required to turn on the system

and reach specified outputs The theory of operation is incorporated into this turn On procedure along with optimizing procedures If any subsystem output does not meet its specifications the operator is referred to the manufacturer s operating and maintenance procedures for that particular laser Correct output signals for each laser are described and optimizing procedures for obtaining these optimum levels are also described This report should be adequate for the daily operation of the system if no problems occur within any subsystem *Operator's Manual ,1981*
