psychology It also entailed the development of new training formats evaluation procedures and implementation strategies The main aim of this book was to provide a summary of the research relevant to these issues and to offer practical guidelines to those who were interested in training or being trained as behaviour therapists For this reason there are chapters by researchers who have been involved in training parents nurses and teachers These chapters provide a detailed account of training in a form that was rarely available in published form at the time and even today should be of great assistance to readers

A Compilation of Moored Current Data and Associated Observations Susan Tarbell, Ann Spencer, 1978 Current temperature and pressure measurements from instruments moored in the MODE area during the years 1971-1975 are presented Record lengths vary from 2 weeks to 7 months Data from individual instruments are displayed in the form of statistical tables spectral plots and variables vs time plots Current data are additionally displayed as progressive vector plots Composite plots of temperature pressure or velocity are included for groups of records which could be combined to show a meaningful spatial or temporal array Selected CTD data are included and displayed as potential temperature and salinity versus pressure Author
