Medusa's Mirrors Julia M. Walker, 1998 The question of selfhood in Renaissance texts constitutes a scholarly and critical debate of almost unmanageable proportions The author of this work begins by questioning the strategies with which male writers depict powerful women Although Spenser's Britomart Shakespeare's Cleopatra and Milton's Eve figure selfhood very differently and to very different ends they do have two significant elements in common mirrors and transformations that diminish the power of the female self

Mirrors of the Divine Emily R. Cain, 2023-01-30 *Mirrors of the Divine* brings into focus how four influential authors of the late ancient world Tertullian of Carthage Clement of Alexandria Gregory of Nyssa and Augustine of Hippo employ language of vision and of mirrors in their discursive struggles to construct Christian agency identity and epistemology Early Christian authors described the vision of God through the Pauline verse 1 Corinthians 13:12 For now we see in a mirror dimly but then we will see face to face Yet each author interpreted this verse differently based on a diverse set of assumptions about how they understood seeing and mirrors to function does vision occur by something leaving or entering the eye Is one impacted by seeing or by being seen Do mirrors offer trustworthy knowledge Spanning the second through fourth centuries CE in both Eastern and Western Christianity *Mirrors of the Divine* analyzes these four authors' theological writings on vision and knowledge of God to explore how contradictory theories of sight shaped their cosmologies theologies subjectivities genders and discursive worlds As Emily R. Cain demonstrates how the authors portray eyes reveals how they envisioned one's relationship to the world while how they portray mirrors reveals how they imagined the unknown Both have dramatic impacts on how one interprets what it means to see God through a mirror dimly She shows that arguments about the phenomenon of visual perception are deeply intertwined with broader debates about identity agency and epistemology and uncovers some of the most self-conscious ways that late ancient Christians thought of themselves their worlds and their God

Suzanne Conklin Akbari, 2004-01-01 During the later Middle Ages new optical theories were introduced that located the power of sight not in the seeing subject but in the passive object of vision This shift had a powerful impact not only on medieval science but also on theories of knowledge and this changing relationship of vision and knowledge was a crucial

element in late medieval religious devotion In *Seeing through the Veil* Suzanne Conklin Akbari examines several late medieval allegories in the context of contemporary paradigm shifts in scientific and philosophical theories of vision After a survey on the genre of allegory and an overview of medieval optical theories Akbari delves into more detailed studies of several medieval literary works including the Roman de la Rose Dante's Vita Nuova Convivio and Commedia and Chaucer's dream visions and Canterbury Tales The final chapter Division and Darkness centres on the legacy of allegory in the fifteenth century Offering a new interdisciplinary synthetic approach to late medieval intellectual history and to major works within the medieval literary canon *Seeing through the Veil* will be an essential resource to the study of medieval literature and culture as well as philosophy history of art and history of science

From Sight to Light A. Mark Smith, 2014-12-26 From its inception in Greek antiquity the science of optics was aimed primarily at explaining sight and accounting for why things look as they do By the end of the seventeenth century however the analytic focus of optics had shifted to light its fundamental properties and such physical behaviors as reflection refraction and diffraction This dramatic shift which A Mark Smith characterizes as the Keplerian turn lies at the heart of this fascinating and pioneering study Breaking from previous scholarship that sees Johannes Kepler as the culmination of a long evolving optical tradition that traced back to Greek antiquity via the Muslim

Middle Ages Smith presents Kepler instead as marking a rupture with this tradition arguing that his theory of retinal imaging which was published in 1604 was instrumental in prompting the turn from sight to light Kepler's new theory of sight Smith reveals thus takes on true historical significance by treating the eye as a mere light focusing device rather than an image producing instrument as traditionally understood Kepler's account of retinal imaging helped spur the shift in analytic focus that eventually led to modern optics A sweeping survey *From Sight to Light* is poised to become the standard reference for historians of optics as well as those interested more broadly in the history of science the history of art and cultural and intellectual history

Chaucer on Love, Knowledge, and Sight Norman Klassen, 1995 The author argues that Chaucer is unorthodox in exploiting the possibilities for using sight both to express emotional experience and to accentuate rationality at the same time The conventional opposition of love and knowledge in the phenomenon of love at first sight gives way in Chaucer's development of love knowledge and sight to a symbiosis in his love poetry
