

Name: _____

Date: _____

Standard Explanation: Ray Tracing (Mirrors)**Vocabulary:** incident ray, reflected ray, focal point, magnification, real image, virtual image**Prerequisite Knowledge Questions** (Use Science 802-0208 as your guide.)

For mirror questions, it would be helpful to have a mental representation of how light rays travel and how images are formed including an example of a mirror.

1. Look at yourself in the back of that spoon (the side where the bowl is). What do you see?

Get up close.The image of a spoon is an example of a **convex mirror**.

2. What do you see when you look at yourself the front of a spoon? **Get up close.**

The back of a spoon is an example of a **concave mirror**.**Classroom Activity**

Use your drawing of a concave mirror as well as a piece of a light bulb positioned to the left of a concave light ray's path to find the light bulb's real image and label it.

To help, add the following labels only for the Concave Classroom Activity. Label the light bulb, turn off the Classroom and add the label through focal point so that only the Parallel Ray is drawing.

3. The label on the back of the mirror is the **magnification** of the mirror. Where the light bulb is the left second, what is always true about the ray that is **reflected** from the parallel ray?

Whether the light source is a light bulb or the light passing through the bulb.
