**Artificial Intelligence in Economics and Management** Phillip Ein-Dor, 2012-12-06 In the past decades several researchers have developed statistical models for the prediction of corporate bankruptcy e.g. Altman 1968 and Bilderbeek 1983. A model for predicting corporate bankruptcy aims to describe the relation between bankruptcy and a number of explanatory financial ratios. These ratios can be calculated from the information contained in a company's annual report. The aim is to obtain a method for timely prediction of bankruptcy, a so-called ultimate purpose called early warning system. More recently, this subject has attracted the attention of researchers in the area of machine learning e.g. Shaw and Gentry 1990, Fletcher and Goss 1993, and Tam and Kiang 1992. This research is usually directed at the comparison of machine learning methods such as induction of classification trees and neural networks with the standard statistical methods of linear discriminant analysis and logistic regression. In earlier research, Feelders et al. 1994 performed a similar comparative analysis. The methods used were linear discriminant analysis, decision trees, and neural networks. We used a data set which contained 139 annual reports of Dutch industrial and trading companies. The experiments showed that the estimated prediction error of both the decision tree and neural network were below the estimated error of the linear discriminant. Thus, it seems that we can gain by replacing the traditionally used linear discriminant by a more flexible classification method to predict corporate bankruptcy. The data set used in these experiments was very small, however.

Banking Law and Financial Regulations John Abolarin, 2025-01-03 Evaluating the financial accounts of the Royal Bank of Scotland Group, Barclays, HSBC, and Standard Chartered Bank from 2004-2018 reveals a taste of the sweetness of success. It also demonstrates what could go wrong in a mega bank: the crippling price of failure and the long hard road to recovery. This book is a historical account of the causes of instability in the banking sector in the past 40 years and an evaluation of the effectiveness or otherwise of a range of laws and regulatory measures adopted to remedy financial crises in the UK over the years. In addition, the book provides a broad review of the evolutionary development of banking and financial laws, starting with seminal case laws on the subject: the Banking Act 1979, the repealed Banking Act 1987, FSMA 2000, the Company Act 2006, the Banking Reform Act 2013, Basel Accords, and sundry EU Directives. John, a Barrister at Law, offered a robust blend of theoretical knowledge and twenty years of practical industry experience in a commercial bank to provide legal perspectives on supervisory models necessary for stability in the banking sector while promoting justification for creating an enabling environment for wealth creation and economic growth. The Methods and Methodology chapter would be an invaluable companion for postgraduate students and researchers.

*Handbook of Research on Accounting and Financial Studies* Farinha, Luís, Cruz, Ana, Baltazar, Sebastião, João Renato, 2020-03-06 The competitive

nature of organizations in today's globalized world has led to the development of various approaches to increasing profitability and maintaining an advantage over rival companies. As technology continues to be integrated into business practices specifically in the area of accounting and finance, professionals and educators need to be prepared for advancing economic techniques and they need to maintain a high level of financial literacy. The Handbook of Research on Accounting and Financial Studies is a pivotal reference source that provides vital research on advanced knowledge and emerging business practices and teaching dynamics in the fields of accounting and finance. While highlighting topics such as cost-benefit analysis, risk management, and corporate governance, this publication explores new initiatives in entrepreneurship and performance management. This book is ideally designed for business managers, consultants, entrepreneurs, auditors, tax practitioners, economists, accountants, academicians, researchers, and students seeking current research on modern advancements and recent findings in accounting and financial studies.

Economic Analysis and Law Christopher E.S. Warburton, 2020-05-20. A comprehensive presentation of the use of economics in judicial decisions, the book is structured to provide all the foundational concepts that are important for the application of economics to the development and interpretation of statutes that emanate from economic conditions. The diversity of the economic field defines the scope of the book and its relevance to the study of law and rule adjudication. Beyond the positive dimensions of law and economics, the book evaluates the normative aspects of law and economics when laws are imprecise and markets are inefficient. The ethical scope of transactions and rule adjudication are further considered in the context of professional ethics and the rationale for ethical considerations in the practice of law and economics. It presents a unique analysis of law, finance, and economics by taking a look at the intricate quantitative requirements that are essential for scientific knowledge in the courtroom and the international dimensions of the practice of law and economics beyond municipal frontiers. It alerts entrepreneurs to risk exposures in the global economy and provides foundational information for readers who are also interested in international law and economics and the essence and interpretations of international conventions appertaining to money expropriation, the environment, and investments in international financial markets. This book is a useful reference for both undergraduate and graduate students who are interested in law and economics, forensic economics, corporate white-collar crime, and legal studies. It is also valuable for certificate programs for paralegals who wish to have a basic understanding of economic and financial concepts.

inter bank business is undergoing dynamic change and is transcending the boundaries of traditional correspondent banking In today s climate no bank regardless of size can grow without the cooperation of other banks and no bank can hope to survive and prosper without utilizing emerging markets Institutional banking in emerging countries has some unique functions for example problem solving is heavier and more crucial in emerging markets than in developed countries given the irregularity of the market and non transparency of the financial legal systems Moreover it is particularly necessary to forge good relationships day to day contact and personal communication to provide better chances for product marketing and risk management Products are therefore tailor made and adapted as the situation dictates a successful lesson for one case in one country cannot necessarily be repeated in another Huang provides a systematic framework for the subject combining both principles and practice The direct experience of the author allows him to write authoritatively about the subject with academic vigour as well as a large amount of practical knowledge which only a practitioner can provide The book contains numerous real life examples and case studies to allow the reader an insight into how Institutional Banking actually works in the real world The book also contains a supplementary CD which includes chapter summary s and further information Note CD ROM DVD and other supplementary materials are not included as part of eBook file

**Global Finance in the 21st Century** Steve Kourabas,2021-09-28 Global Finance in the 21st Century Stability and Sustainability in a Fragmenting World explains finance and its regulation after the global financial crisis The book introduces non finance scholars into the wider debate regarding the conduct and regulation of finance to encourage broader discussion on important societal issues that relate to finance The book also explores the ineffectiveness of the current approach to global prudential governance and places this discussion within the more expansive context of global governance and nationalism in the twenty first century The book argues that fragmentation and the growing trend of promoting informality and voluntarism has facilitated a return to nationalism as a primary form of global governance that acts contrary to post crisis reforms that seek to promote stability and sustainability in the conduct of finance As a remedy Kourabas suggests that we need more not less of what we have traditionally conceived as international law treaties and treaty based international organisations In the field of finance this means not only pursuing financial liberalisation through free trade and investment treaties but also the inclusion of provisions in these treaties that promotes systemic financial stability and sustainable development objectives Of interest to legal and non legal academics and students legal professionals and policy makers this book offers a nuanced defence of international law as an approach to global governance in finance and beyond as well as reform of international law to meet the needs of twenty first century society
