Bolesław Domański,Grzegorz Micek,Robert Guzik,Krzysztof Gwosdz,Arkadiusz Kocaj,2024-08-29 The book provides a picture of the increasing significance of Central Europe and especially Poland in global production networks discussing the underlying economic social and political factors The key question it answers is to what extent the growth of production and exports results in industrial upgrading towards the manufacturing of more sophisticated high value added products new technologies and the development of non production functions especially design and advanced service capabilities The book shows that Central European manufacturing no longer exhibits the typical features of production activities in the periphery in particular low density and diversity low productivity narrow specialisation in low value added activities and poor local linkages hence limited local value creation and value capture There is still dependence on foreign controlled enterprises in several sectors and limited product innovation which remains a major weakness Further the book assesses the social consequences of the ongoing development of manufacturing capabilities in Poland and its impact on employment conditions including the quality of jobs and level of wages The authors provide insight into relationships between globalisation processes place specific attributes and current economic policies and as such the book will be of interest to academics policy makers and other stakeholders interested in both peripheral economies and core countries and representing various international organisations dealing with economic transition and development Demand-Side Management and Electricity End-Use Efficiency A. de Almeida,Arthur H. Rosenfeld,2012-12-06 A NATO Advanced Study Institute on Demand Side Management and Electricity End Use Efficiency was held in order to present and to discuss some of the most recent developments in demand side electric power management and planning methodologies as well as research progress in relevant end use technologies Electricity is assuming an increasingly important role in buildings and industry due to its flexibility efficiency of conversion and cleanliness at the point of use However the production and transmission of electricity requires huge investments and may have undesirable environmental impacts The recent nuclear accident in Chernobyl and the damage caused by acid precipitation are creating increasing concerns about the impacts of power plants Some environmental problems are local or regional others such as global warming can affect the whole world Although environmental impacts may be minimized with additional investments electricity generation will become even more capital intensive Energy and electricity in particular is not directly consumed by people To achieve improved standards of living what is important is the level of production of goods and services If it is possible to produce the same quantity of goods and services with less electricity and in a cost effective way substantial benefits can be gained By reducing costs electricity

efficiency can raise the standards of living and increase the competitiveness of an economy Electricity efficiency also leads to reduced requirements in power plant operation thus leading to reduced consumption of primary energy supplies and a higher quality environment

Energy Efficiency in Household Appliances and Lighting Paolo Bertoldi, Andrea Ricci, Anibal de Almeida, 2012-12-06 Household appliances encompass a large variety of equipment including the cold appliances refrigerators and freezers the wet appliances washing machines dishwashers and dryers the space conditioning appliances heaters air conditioners heat pumps fans boilers the water heaters the cooking appliances a wide array of consumer electronics such as TVs VCRs HiFi systems and miscellaneous small appliances such as vacuum cleaners irons toasters hairdryers and power tools Household appliances save a large amount of domestic labour to perform the household tasks as well as provide comfort conditions and convenience to the household occupants The European Community SAVE Programme has promoted the efficient use of energy in particular in domestic appliances SAVE has sponsored a variety of studies to characterise the use of the main household appliances and lighting and to identify cost effective technical options to improve the energy efficiency as well as to identify the strategies to promote the penetration of efficient equipment in the market place National energy agencies independent experts and appliance manufacturers have participated in the SAVE activities and have done a remarkable job While the energy efficiency of the main household appliances has been improved at the same time it was possible in most cases to improve the appliance performance reliability and quality of service

Gas Appliance Merchandising, 1930 **How to Live a Low-Carbon Life** Christopher Goodall, 2012-05-04 Climate change is the greatest challenge facing humanity drastic reduction of carbon emissions is vital if we are to avoid a catastrophe that devastates large parts of the world Governments and businesses have been slow to act and individuals now need to take the lead The Earth can absorb no more than 3 tonnes of carbon dioxide emissions each year for every person on the planet if we are to keep temperature and rainfall change within tolerable limits Yet from cars and holiday flights to household appliances and the food on our plates Western consumer lifestyles leave each of us responsible for over 12 tonnes of carbon dioxide a year four times what the Earth can handle Individual action is essential if we want to avoid climate chaos How to Live a Low Carbon Life shows how easy it is to take responsibility providing the first comprehensive one stop reference guide to calculating your CO₂ emissions and reducing them to a sustainable 3 tonnes a year

The Rule of Three Jagdish Sheth, Rajendra Sisodia, 2002-05-14 Name any industry and more likely than not you will find that the three strongest most efficient companies control 70 to 90 percent of the market Here are just a few examples McDonald's Burger King and Wendy's General Mills Kellogg and Post Nike Adidas and Reebok Bank of America Chase Manhattan and Banc One American United and Delta Merck Johnson and specialists which satisfy the needs of customers at both the high and low ends of the market Any company caught in the middle the ditch is likely to be swallowed up or destroyed Sheth and Sisodia show how most markets resemble a shopping mall with specialty shops anchored by large stores Drawing wisdom from these markets The

Rule of Three offers counterintuitive insights with suggested strategies for the Big 3 players as well as for mid sized companies that may want to mount a challenge and for specialists striving to flourish in the shadow of industry giants The book explains how to recognize signs of market disruptions that can result in serious reversals and upheavals for companies caught unprepared Such disruptions include new technologies regulatory shifts innovations in distribution and packaging demographic and cultural shifts and venture capital as well as other forms of investor funding Years in the making and sweeping in scope The Rule of Three provides authoritative research based insights into market dynamics that no business manager should be without Strategic Management Arthur A.
