families tends to be lower when the father is present and more highly educated A strong academic climate both among friends and at home also tends to erode stereotypes that disconnect academic prowess and a healthy masculine identity Similarly high schools with strong science curricula reduce the power of gender stereotypes concerning science and technology and encourage girls to major in scientific fields As the value of a highly skilled workforce continues to grow The Rise of Women argues that understanding the source and extent of the gender gap in higher education is essential to improving our schools and the economy With its rigorous data and clear recommendations this volume illuminates new ground for future education policies and research
