It is quite simply about the world in which we live. Geography is unique in bridging the social sciences (human geography) with the natural sciences (physical geography). Human geography concerns the understanding of the dynamics of cultures, societies, and economies, and physical geography concerns the understanding of the dynamics of physical landscapes and the environment. Geography puts this understanding of social and physical processes within the context of places and regions, recognizing the great differences in cultures, political systems, economies, landscapes, and environments across the world and the links between them.
