Chapters feature questions and fill-in-the-blank exercises allowing students to check their understanding of the subject matter and assess their progress early on. Everything in the book is designed to answer the question "What do I need to know?" The fourteen chapters of the book cover the many areas involved in environmental science and environmental studies, including chemical, physical, biological, and earth science principles, earth spheres, and biomes. Also covered are environmental cycles, material and energy resources, pollution, and environmental laws and regulations. Each chapter begins with an explanation of the topic to be discussed and indicates where in a textbook students can find complete discussions, figures, charts, and tables. Chapter exercises are presented in multiple-choice, fill-in-the-blank, and matching formats, allowing students many opportunities for self-evaluation prior to taking class examinations.
