Environmental And Natural Resource Economics 5th Edition:

Environmental and Natural Resource Economics Jonathan M. Harris, Brian Roach, 2021-11-28 Environmental issues are of fundamental importance and a broad approach to understanding the relationship between the human economy and the natural world is essential. In a rapidly changing policy and scientific context, this new edition of *Environmental and Natural Resource Economics* reflects an updated perspective on modern environmental topics. Now in its fifth edition, this textbook includes enhanced and updated material on energy, climate change, greening the economy, population, agriculture, forests, and water, reflecting the greater urgency required to solve the big environmental problems in these areas. It introduces students to both standard environmental economics and the broader perspective of ecological economics, balancing analytical techniques of environmental economics topics with a global perspective on current ecological issues such as population growth, global climate change, and green national income accounting. Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment. This perspective, combined with its emphasis on real world policies, is particularly appealing to both instructors and students. This is the ideal text for undergraduate classes on environmental, natural resource, and ecological economics, and postgraduate courses on environmental and economic policy. Environmental Economics and Natural Resource Management David A. Anderson, 2013-09-23 The tools of environmental economics guide policymakers as they weigh development against nature, present against future, and certain benefits against uncertain consequences. From

reluctant but necessary calculations of the value of life to quandaries over profits at the environment's expense the policies and research findings explained in this textbook are relevant to decisions made daily by individuals firms and governments The fourth edition of Environmental Economics and Natural Resource Management pairs the user friendly approaches of the previous editions with the latest developments in the field A story based narrative delivers clear concise coverage of contemporary policy initiatives To promote environmental and economic literacy we have added even more visual aids including color photographs and diagrams unmatched in other texts Ancillaries include an Instructor's Guide with answers to all of the practice problems and downloadable slides of figures and tables from the book The economy is a subset of the environment from which resources are obtained workers and consumers receive sustenance and life begins Energy prices and environmental calamities constrain economic growth and the quality of life The same can be said about overly restrictive environmental policies It is with an appreciation for the weighty influence of this discipline and the importance of conveying it to students that this textbook is crafted

Environmental and Natural Resources Economics Steven Hackett, Sahan T. M. Dissanayake, 2018-06-01 The 5th edition of Environmental and Natural Resources Economics Theory Policy and the Sustainable Society expands on successful previous editions by adding new chapters on non market valuation ecosystem services and the use of behavioral economics for environmental policy and reorganizing the text with a new methodology chapter that presents the tools in the environmental economist's toolkit In addition to these four new chapters the revised edition also incorporates a series of active learning exercises and in class games to help students gain a deeper and immediate understanding of the key concepts being taught throughout the text The text is organized into four sections The first section Theory and Fundamentals introduces the reader to the core principles of economics used throughout the text The second section Policy illustrates how economic tools and methods are used for environmental policy analysis focusing on incentive regulation compliance and crime and political economy The next section Natural Resource Economics presents an introduction to natural resource economics followed by an in depth chapter on fisheries and a new chapter on ecosystem services The final section Topics on the Economics of Sustainability introduces the concept of sustainability and then provides detailed examples and case studies in sustainable economic development issues in sustainable production and issues in sustainable management of common pool resources The textbook is designed for use in an environmental and natural resource economics course and as with prior editions is versatile enough to work either for economics majors or for students in interdisciplinary environmental studies science programs

Environmental and Natural Resource Economics Tom Tietenberg, Lynne Lewis, 2023-07-31 Environmental and Natural Resource Economics is one of the most widely used textbooks for environmental economics and natural resource economics courses offering a policy oriented approach and introducing economic theory and empirical work from the field Students will develop a global perspective of both environmental and natural resource economics and how they interact This 12th edition provides updated data new studies

and more international examples There is a considerable amount of new material with a deeper focus on climate change and coverage of COVID 19 social justice and the circular economy Key features include Extensive coverage of major contemporary issues including climate change water and air pollution resource allocation biodiversity protection sustainable development and environmental justice Four chapters specifically devoted to climate economics including chapters on energy climate mitigation carbon pricing and adaptation to climate change Introductions to the theory and method of environmental economics including externalities benefit cost analysis valuation methods and ecosystem goods and services and updates to the social cost of carbon New examples and debates throughout the text highlighting global cases and major talking points Environmental and Natural Resource Economics supports students with end of chapter summaries discussion questions exercises and further reading in the book and the companion website offers additional learning and teaching resources

Natural Resource Economics Barry C. Field, 2023-07-21 The connection between humans and the earth's natural resources is a topic of vital interest Concern once centered on whether there were sufficient supplies of natural resources to accommodate the rising demands of growing economies a newer concern is whether those growing economies will undermine the linkages between humans and the earth's critical ecological endowments It is essential to understand the reciprocity of how human decisions affect resources and how resources affect humans Natural resource economics is one way of framing and analyzing choices about the conservation and use of natural resources made daily by individuals communities and nations The focus of the text is on natural resource valuation economic incentives and the institutional arrangements that will produce desired collective outcomes The fourth edition of this acclaimed text presents the analytical framework of economics in easy to understand descriptions for readers who have not yet been exposed to economics The first nine chapters offer a lucid introduction to fundamental economic principles and their application to questions about natural resource use Ten topical chapters address specific natural resources The final two chapters examine natural resource issues encountered in developing countries and the impacts of globalization on the utilization and conservation of natural resources Topics new to this edition include equity issues in natural resources decisions existence value of wildlife technological change natural capital payment for environmental services rare earths food security and collective property rights

Environmental and Natural Resource Economics Thomas H. Tietenberg, 1988 Continuing the trend toward a more international focus Tietenberg's Fifth Edition increases attention paid to environmental problems and policies in Europe China and developing nations *Environmental and Natural Resource Economics* Thomas H. Tietenberg, 2000 This 5th edition contains boxed examples that highlight special topics in every chapter In addition there are three new chapters Sustainable Development Concepts that Lie Behind Economics Valuation and Methods of Valuing the Environment

Environmental Economics and Natural Resource Management Third Edition David Anderson, 2010-03-11 The tools of environmental economics guide policymakers as they weigh development against nature present against future and

certain benefits against uncertain consequences From reluctant but necessary calculations of the value of life to moral quandaries over profits at the environment's expense the models and findings explained in this textbook are relevant to today's more pressing dilemmas The third edition of *Environmental Economics and Natural Resource Management* retains the application based narratives and visual emphasis of the second edition while covering the latest policy initiatives following recent trends and becoming even more user friendly An expanded array of color photographs diagrams and other visual aids provide new perspectives on global environmental and resource issues The book covers topics including Efficiency and Cost Benefit Analysis Natural Resource Management Globalization Environmental Ethics Population Growth and Poverty This fascinating textbook will be invaluable to students undertaking courses in environmental economics ecological economics and environmental and resource economics The book includes an online Instructor's Guide with answers to all the practice problems as well as downloadable slides of figures and tables from the book

Economics of the Environment Horst Siebert, 2008-01-03 The book interprets nature and the environment as a scarce resource It offers a theoretical study of the allocation problem and describes different policy approaches to the environmental problem The entire spectrum of the allocation issue is studied The author incorporates several economic approaches including neoclassical analysis the public goods approach and optimization theory The different aspects of environmental allocation are studied in the context of a single model that is used throughout the book The sixth edition includes new sections on ethical aspects of environmental evaluation and international emission trading and biodiversity

Out of the Mainstream Rutgerd Boelens, David H. Getches, Jorge Armando Guevara Gil, 2010 Water is not only a source of life and culture It is also a source of power conflicting interests and identity battles Rights to materially access culturally organize and politically control water resources are poorly understood by mainstream scientific approaches and hardly addressed by current normative frameworks These issues become even more challenging when law and policy makers and dominant power groups try to grasp contain and handle them in multicultural societies The struggles over the uses meanings and appropriation of water are especially well illustrated in Andean communities and local water systems of Peru Chile Ecuador and Bolivia as well as in Native American communities in south

western USA The problem is that throughout history these nation states have attempted to civilize and bring into the mainstream the different cultures and peoples within their borders instead of understanding context and harnessing the strengths and potentials of diversity This book examines the multi scale struggles for cultural justice and socio economic re distribution that arise as Latin American communities and user federations seek access to water resources and decision making power regarding their control and management It is set in the dynamic context of unequal globalizing power relations politics of scale and identity environmental encroachment and the increasing presence of extractive industries that are creating additional pressures on local livelihoods While much of the focus of the book is on the Andean Region a number of comparative chapters are also included These address issues such as water rights and defence strategies in neighbouring countries and those of Native American people in the southern USA as well as state reform and multi culturalism across Latin and Native America and the use of international standards in struggles for indigenous water rights This book shows that against all odds people are actively contesting neoliberal globalization and water power plays In doing so they construct new hybrid water rights systems livelihoods cultures and hydro political networks and dynamically challenge the mainstream powers and politics Publisher s description

triangular relationship between business consulting knowledge absorptive capacity and innovativeness The role of knowledge absorptive capacity in stimulating the impact of business consulting on innovativeness is studied

METHODOLOGY An empirical study is conducted using the CATI method and it is based on data concerning 382 Polish micro and small enterprises Qualitative variables reflecting using business consulting knowledge absorptive capacity and innovativeness are defined The multivariate discrete choice model taking into account relationships among these constructs is proposed and its parameters are estimated

FINDINGS The results of the empirical research indicate that business consulting in Poland and similar countries may help firms implement innovative solutions Knowledge absorptive capacity stimulates innovativeness and has a positive impact on the relationship between using business consulting and improvement in innovativeness Though the frequency of using business consulting is an important factor in improving innovativeness cooperation between a consultant and a manager matters more

IMPLICATIONS Results of the empirical research indicate that cooperation between a consultant and a manager may help reduce differences of opinion and internal conflicts A higher propensity to cooperate may significantly improve the functioning of an enterprise Business consulting has an indirect and direct effect on innovativeness It has a positive impact on knowledge absorptive capacity while better knowledge stimulates innovativeness

ORIGINALITY AND VALUE An original triangular model of the relationship between business consulting knowledge absorptive capacity and innovativeness is proposed Advanced econometric methods are used in order to find complex relationships between using business consulting knowledge absorptive capacity and improvement in innovativeness Moreover results of the estimation of the parameters of the econometric model provide interesting recommendations for policies supporting the development of business consulting in the Polish economy

Keywords business consulting knowledge absorptive capacity innovativeness multivariate discrete choice model development support policy econometric model economy Sustainable development and entrepreneurship in emerging countries Are sustainable development and entrepreneurship reciprocally reinforcing

Abstract **PURPOSE** Entrepreneurship seen as an engine for economic development is especially desirable for emerging countries to support rapid growth Moreover entrepreneurs can support social transformation in favor of more sustainable products and services Sustainable orientation of entrepreneurship contributes to sustainable development goals and prevents environmental deprivation However the sustainable development agenda can also influence entrepreneurship

METHODOLOGY The conducted bibliometric analysis confirmed the growing interest among scholars in the correlation of entrepreneurship to sustainability in the last years Furthermore panel regression static model was used to explore the variables on entrepreneurship influencing the sustainable development goal SDG index in emerging countries and Levin Lin and Chu LLC W Stat IPS ADF Fisher Chi Square and PP Fisher Chi Square tests were applied to analyze the variables stationarity In order to examine the existence of structural breaks the robustness was checked on single cross section units and on the whole panel dataset In addition the Hausmann test was used to select between random

and fixed effects and heteroskedasticity of residues autocorrelation of residues and dependence of residues between the panels were conducted Data was analyzed through Eviews 13 FINDINGS This paper investigates the relationship between sustainability and entrepreneurship in emerging countries It discusses the impact of sustainable development on entrepreneurship and the influence of entrepreneurship on sustainable development IMPLICATIONS The study results can be used by governments and policymakers to plan their strategies and policies concerning entrepreneurship and implementation of sustainable development goals They should promote entrepreneurial activity and control the negative environmental impact of enterprises simultaneously ORIGINALITY AND VALUE The research addresses the gap in the literature concerning the relationship between sustainable development and sustainable entrepreneurship The paper examines the reciprocal relationship between sustainable development and entrepreneurship with an emphasis on emerging countries Keywords entrepreneurship sustainability sustainable development sustainable entrepreneurship emerging countries entrepreneurs Is Team Entrepreneurial Orientation important in generating creative business ideas The moderating role of team perceived heterogeneity and the individual creative mindset Abstract PURPOSE The study aims to unveil if Team Entrepreneurial Orientation TEO facilitates identification of creative market opportunities understood as novelty and quality business ideas Entrepreneurial Orientation EO has rarely been measured at a team level and few studies have attempted to examine the relationship between EO and actual creative outcomes The proposed research model searches for new patterns that can foster creativity of entrepreneurial teams In addition the research adds the moderating effect of perceived team heterogeneity and individual creative mindset Growth Creative and Fixed Creative Mindsets as contingency variables to improve the understanding under which circumstances the entrepreneurial teams generate creative business ideas METHODOLOGY The research sample comprises entrepreneurial teams from the Mondragon Team Academy in the Basque Country Spain The survey data were collected after the entrepreneurial teams performed idea generation The applied experiment of idea generation of entrepreneurial teams has not been generated for the purpose of the study but it formed part of the natural processes of the selected sample of teams The novelty and quality of business ideas were evaluated by experts in the field The data relationships were analyzed through partial least square structural equation modeling PLS SEM FINDINGS Entrepreneurial Orientation of teams leads to product market entries but not necessarily to novel product market entries Entrepreneurially oriented teams have a greater tendency to generate quality and slightly modified existing business ideas rather than to generate novel market opportunities The applied moderators present different interaction results with the studied relationships Specifically individuals with a Fixed Creative Mindset in a team have an antagonistic interaction on the TEO Quality relationship Team Perceived Heterogeneity and Growth Creative Mindset of individuals have no effect on either the TEO Quality or the TEO Novelty link IMPLICATIONS The research demonstrates the importance of contextualization of the nature of creativity in EO as a crucial antecedent of market innovations Our study

adds to the literature and practice by providing evidence that EO at a team level TEO plays a critical role in exploring product market entries given that TEO facilitates Quality outcomes only Entrepreneurially oriented teams do not easily achieve Novel outcomes that allow them to enter new markets Individuals with Fixed Creative Mindset in a team should be avoided as they block the relationship between Team Entrepreneurial Orientation and Quality Likewise our study supports the validity of Entrepreneurial Orientation at a team level which can lead to more suitable practical implications for a team and its creativity management if applied It could help in developing appropriate team formation and team management practices ORIGINALITY AND VALUE The study proposes rare and unique EO analysis at a team level and at young companies level start up The study contributes to the original and overlooked in the literature conceptualization of EO within Schumpeter s perspective of creative destruction in entrepreneurial activities The examined theoretical foundations of EO led to clearer antecedents of behavioural effects of entrepreneurial teams towards product market entries The study initiates identifies and calls for new further research lines to contribute to a greater and contingent understanding of how entrepreneurial teams generate creative business ideas especially novel business ideas which are necessary for creative destruction the EO construct itself and overall economic development Keywords entrepreneurship creativity team entrepreneurial orientation creative outcomes Subjective norms and entrepreneurial intention A moderated serial mediation model Abstract PURPOSE This study aims to clarify the effect mechanism of subjective norms on entrepreneurial intention The results of how subjective norms contribute to forming start up intention are inconsistent and unclear which is notable in previous research By integrating the theory of planned behavior and the theory of self efficacy we investigate whether entrepreneurial self efficacy and attitude toward entrepreneurship serially mediate the relationship between subjective norms and intention to start a business In addition this study examines the moderate role of entrepreneurial education on the serial indirect effect of subjective norms on entrepreneurial intention via entrepreneurial self efficacy and attitude toward entrepreneurship METHODOLOGY This study utilized a sample of 958 master s students in Vietnam to investigate a moderated serial mediation model of subjective norms on entrepreneurial intention Confirmatory factor analysis CFA was carried out to check the reliability and validity of the scales Then the SPSS PROCESS macro developed by Hayes was employed to test the research model Specifically Model 6 was used to examine the serial indirect effect of subjective norms on start up intention and Model 84 was implemented to investigate the moderate effect of entrepreneurial education FINDINGS The results of this study found that entrepreneurial self efficacy and entrepreneurial attitude significantly mediate subjective norms effect on entrepreneurial intention Especially the results reveal that the serial mediation effect of entrepreneurial self efficacy and attitude toward entrepreneurship was significant and entrepreneurial self efficacy and attitude toward entrepreneurship played a fully mediating role in the relationship between subjective norms and start up intention In addition this study found that the serial mediation effect of subjective norms on start up intention via

entrepreneurial self efficacy and entrepreneurial attitude was negatively moderated by entrepreneurial education

IMPLICATIONS The results of this study further clarify the relationship between subjective norms and entrepreneurial intention and the role of entrepreneurial education therefore contributing to narrowing the notable gap between this relationship Besides our study provides several implications for governments and policymakers to promote the intention to start a business The finding of our study indicates that subjective norms are an important factor in promoting entrepreneurial intention Therefore policymakers should take some actions to promote entrepreneurial culture such as strengthening propaganda activities to promote the image of successful entrepreneurs praising businesses and entrepreneurs who contribute to society and giving evidence of their contribution to the development of the country Promoting an entrepreneurial culture may increase peer group pressure on potential entrepreneurs thus enhancing the intention to start a business

ORIGINALITY AND VALUE This study expects to contribute to a better understanding of the effect mechanism of subjective norms on entrepreneurial intention and explain the role of entrepreneurial education in this relationship This study explores the mediating role of entrepreneurial self efficacy and entrepreneurial attitude in the relationship between subjective norms and the intention to start a business Additionally this study demonstrates that entrepreneurial education weakens the serial mediation model of subjective norms on the intention to start a business

Keywords subjective norm entrepreneurial self efficacy attitude toward entrepreneurship entrepreneurial intention entrepreneurial education the theory of planned behavior the theory of self efficacy moderated serial mediation model An overview of the empirical research on entrepreneurial alertness using a systematic literature review method

Abstract
PURPOSE In the last two decades the concept of entrepreneurial alertness EA has been considered a key element in investigating how individuals recognize entrepreneurial opportunities Consequently research on entrepreneurial alertness has grown considerably attracting researchers attention from not only the field of entrepreneurship but also other academic disciplines through which this concept has been studied from a variety of perspectives Therefore it is time to document researchers cumulative knowledge on entrepreneurial alertness The present study aims to provide a comprehensive qualitative review and evaluation of the empirical entrepreneurial alertness research
METHODOLOGY Based on a multi step approach used in previous studies which guarantees a systematic transparent and replicable literature review this study identified a final sample of 84 articles published in scientific journals between 2005 and 2021 that empirically tested the concept of EA The publications were sourced from the Web of Science database Their analysis involved the evolution of published articles the journals that have published the most articles the countries where the research was undertaken the measurement scales that have been used and the research models in which entrepreneurial alertness has been hypothesized and examined through empirical research
FINDINGS The results show that empirical research on entrepreneurial alertness grew significantly from 2016 to 2021 during which period almost 11 articles per year were published Seven of the journals

that published the articles contributed 28 percent of the total publications Also the results confirm that most of the empirical research on alertness has been carried out in developing economies from which China stands out with 14 publications representing 16 percent of the total Additionally the results confirm the growing consensus regarding the conceptualization and measurement of entrepreneurial alertness Finally the review resulted in the identification of five broad research models in which EA has been hypothesized and examined through empirical research antecedents consequences mediation moderation and moderated mediation The model examining the consequences or outcomes of entrepreneurial alertness has received the most attention with 59 articles in this context

IMPLICATIONS FOR THEORY AND PRACTICE The identification of concepts and the type of relationship they have with entrepreneurial alertness help evaluate the advances of empirical research as well as the areas of opportunity In this way future studies can strengthen research and thus advance the general knowledge of alertness The most studied topics are also a reflection of the contribution of entrepreneurial alertness toward practice both at the individual and organizational levels In addition researchers interested in entrepreneurial alertness are encouraged to consider the progress made in the measurement of this aspect which offers alternatives for investigation

ORIGINALITY AND VALUE Based on the review of the literature this study organizes the empirical research of entrepreneurial alertness in different research models which provide important insights into its process Moreover this study uncovers potential areas to be addressed and thereby contributes to the study of entrepreneurial alertness

Keywords entrepreneurial alertness systematic literature review entrepreneurial opportunity research models opportunity recognition alertness entrepreneurship The linkage between economic literacy and students intention of starting business The mediating role of entrepreneurial alertness

Abstract **PURPOSE** Enhancing the number of entrepreneurs is a major study to combat economic and social problems Psychological factors considered as effective stimulants for entrepreneurial behavior have attracted many researchers in the last decade The purpose of this research attempts to examine how the influence of economic literacy can promote the intention of starting a new business among students and explore the role of entrepreneurial alertness in mediating this relationship

METHODOLOGY The research adopted a quantitative approach in which hypotheses were statistically estimated using partial least square structural equation modeling PLS SEM based on survey data using a self administered questionnaire n 450 from several universities in Indonesia

FINDINGS The analysis indicates that economic literacy has a significant effect on students entrepreneurial alertness and intention to start a new business Indeed entrepreneurial alertness can mediate the relationship between economic literacy and the intention of starting a new business However among entrepreneurial alertness dimensions scanning and search failed in determining the students intention of starting a new business

IMPLICATIONS The result of this research can provide insight into the literature on the entrepreneurship theme and policymakers concerned with delivering new business creation Besides educational institutions can consider the matter of economic literacy to be part of their curricula in order to foster the

students intention of starting a business In addition economic literacy also needs to be associated with examples relevant to entrepreneurial activities especially in production distribution and online marketing ORIGINALITY AND VALUE The interesting findings of this paper serve as a reminder that entrepreneurial alertness is one of the predictor variables and mediators for raising the students intention This implies that entrepreneurial alertness can be enhanced by economic literacy as well as how they need to be used to improve course curriculum and the teaching pedagogy Furthermore educational institutions could provide business internship programs and entrepreneurship incubators to raise the students intention of starting business Keywords economic literacy entrepreneurial alertness intention starting business
