aspects of ecology today Case studies in most chapters show examples of real progress and What Can You Do lists give students ideas for contributing to solutions

Mammals of the Southeastern United States Troy L. Best, John L. Hunt, 2020-08-25 First comprehensive account of the mammals of the entire southeastern US The southeastern United States is home to a remarkable and diverse mammalian fauna that is a significant part of the region's rich natural heritage *Mammals of the Southeastern United States* presents accounts of 137 species that currently or previously occurred in the Southeast Although accessible and useful for the generalist this book provides an up to date compilation of basic knowledge about native and nonnative mammals of the region that is suitable for students of all ages and for professional mammalogists and biologists alike This volume profiles common species like the eastern gray squirrel the white tailed deer and the Virginia opossum but also includes among its accounts many extant species such as the jaguar and porcupine that once occurred in the region native species like the Caribbean monk seal that are now extinct native species that have been extirpated or wiped out from all or part of the region such as the red wolf cougar American bison and elk and many introduced species including the Mexican mouse opossum common squirrel monkey and capybara Each species account includes full color images of the animal plates featuring at least three views of its skull color distribution maps of its approximate geographic range in the Southeast and in North America and an up to date synthesis of several aspects of its biology including habitat diet predators parasites diseases and behaviors An introductory chapter on conservation summarizes the current status of mammalian populations in the region and provides insight into some of the threats mammals now encounter in the Southeast

The 'Ecosystem Approach' in International Environmental Law Vito De Lucia, 2019-03-28 The ecosystem approach broadly understood as a legal and governance strategy for integrated environmental and biodiversity management has been adopted within a wide variety of international environmental legal regimes and provides a narrative a policy approach and in some cases legally binding obligations for States to implement what has been called a new paradigm of environmental management In this last respect the ecosystem approach is also often considered to offer an opportunity to move beyond the outdated anthropocentric framework underpinning much of international environmental law thus helping re think law in the Anthropocene Against this background this book addresses the question of whether the ecosystem approach represents a paradigm shift in international environmental law and governance or whether it is in conceptual and operative continuity with legal modernity This central question is explored through a combined genealogical and biopolitical framework which reveals how the ecosystem approach is the result of multiple contingencies and contestations and of the interplay of divergent and sometimes irreconcilable ideological projects The ecosystem approach this book shows does not have a univocal identity and must be understood as both signalling the potential for a decisive shift in the philosophical orientation of law and the operationalisation of a biopolitical framework of control that is in continuity with and even intensifies the eco destructive tendencies of legal modernity It is however in revealing this disjunction that the book opens up the possibility of

moving beyond the already tired assessment of environmental law through the binary of anthropocentrism and ecocentrism

Law and Ecology Richard O. Brooks, Ross Jones, 2017-07-05 In 1970 Earth Day was first celebrated marking the dawn of worldwide environmental consciousness and the passing of many environmental laws In part these events were the result of the maturing of the science of ecology which recognized the interdependence of the web and cycles of nature This volume explores the relationship between ecology and environmental law beginning with a description of the two very different disciplines This description is followed by a history of their episodic interactions the early period of origin the mid century formative period from 1950 to 1970 the initial serious period of interaction after Earth Day in 1970 and the testing of the relationship during the next two decades Utilizing a number of case studies examinations of the key linkage persons legal instruments and the migration of ecological concepts and frameworks this book analyzes the final flowering of an ecosystem regime which embraces the connections between the two disciplines of ecology and environmental law Concluding with an inventory of the problems posed by the relationship between the two disciplines and an agenda for future research this clearly structured comprehensive and stringent book is an essential resource for all serious scholars and students of ecology and environmental law

Ecology and the Biosphere Sharon L. Hanks, 1996-05-01 Here is a valuable one semester course text for non science majors that delivers It is concise focused on material that will enable students to make intelligent choices about the future of the earth and written in a style that will enable students to make connections to their own lives Students want to know how science relates to their lives how the biosphere works what is wrong with it and what they can do to make a difference Now there is a new text that provides the information students need and gives real life examples that make the learning process more interesting and relevant

THREE MAIN DIVISIONS OF TEXT

- 1 What science is and what students need to know about it
- 2 The biosphere how it works and its current problems
- 3 What students can do about the problems

ABOUT THE AUTHOR Dr Sharon La Bonde Hanks teaches biology at William Paterson College in New Jersey She holds a Ph D from Rutgers University Her 33 years in teaching have concentrated on biology and environmental science with research focused on ecology taxonomy and systematic palynology She has a special interest in writing about the discipline assessment and race gender issues in science Hanks is the author of a major text on how to teach biology using the process approach In addition she runs workshops and is a consultant an expert perennial gardener and naturalized landscaper and an avid student of Tai Chi She is most proud of her memberships in the New Jersey Audubon Weis Ecology Center Habitat for Humanity and the Nature Conservancy

Environmental Problem Solving Marjan Vezjak, Elmar A. Stuhler, Matjaž Mulej, 1997

Resources in Education, 1996 (Free Sample)

methodology which comprises of Mind Maps Infographics Charts Tables and latest exam pattern MCQs The book is divided into 9 chapters with 1000 MCQs 4 Types of self Evaluation Exercises Exercise 1 UPSC CSE Previous Year Questions 2017 2024 Exercise 2 State PSC Previous Year Questions Exercise 3 NCERT Based Exercises mapped to Classes 6 12 Exercise 4 Basic Advance Practice Questions Also includes Mains Chapter wise Previous Year Practice Questions As per latest UPSC CSE syllabus and examination pattern

An Ecology of World Literature Alexander Beecroft, 2015-01-06 What constitutes a nation's literature How do literatures of different countries interact with one another In this groundbreaking study Alexander Beecroft develops a new way of thinking about world literature Drawing on a series of examples and case studies the book ranges from ancient epic to the contemporary fiction of Roberto Bolaño and Amitav Ghosh Moving across literary ecologies of varying sizes from small societies to the planet as a whole the environments in which literary texts are produced and circulated An Ecology of World Literature places in dialogue scholarly perspectives on ancient and modern western and non western texts navigating literary study into new and uncharted territory

The Psychology of Environmental Problems, 2014-04-04 A revision of Winter's Ecological Psychology 1996 this book applies psychological theory and research to environmental problems After outlining current environmental difficulties the authors demonstrate how 6 major approaches in psychology social psychological psychoanalytic behavioral physiological cognitive and holistic can be applied to environmental problems The authors demonstrate why it is critical to address environmental threats now and offer ideas on how psychological principles can contribute to building a sustainable culture Personal examples engage the reader and provide suggestions for changing behavior and political structures Reorganized and updated throughout the second edition features a new chapter on neuropsychological and health issues and a list of key concepts in each chapter Cartoons and humorous analogies add a light touch to the book's serious message Written for psychology and environmental studies students the book is an excellent teaching tool in courses on environmental conservation or ecological issues found in departments of psychology sociology environmental science and biology It will also appeal to anyone interested in psychology's potential contributions to mounting ecological difficulties

How Can We Solve Our Social Problems? James A. Crone, 2015-10-29 Many of today's social problems poverty crime racism sexism drug abuse unequal access to quality health care or education threats to the environment over population can seem intractable James A. Crone's *How Can We Solve Our Social Problems* Third Edition is designed to give students studying these types of social problems a sense of hope Unlike the standard survey texts that focus heavily on the causes and consequences of problems this book is devoted to analyzing possible solutions It maintains a sense of sociological objectivity throughout and without moralizing describes what could be done in America and on a global scale through government policies private sector initiatives and the collective actions of citizens to address even our most pervasive social problems

The Psychology of Environmental Problems Susan M. Koger, Deborah DuNann Winter, 2011-01-07 This compelling and insightful textbook demonstrates how eight major

approaches in psychology social psychoanalytical behavioral cognitive physiological health developmental and holistic can be applied to create a more sustainable society After outlining current environmental difficulties and historical antecedents these various perspectives offer guidance for changing individual and collective behavior This 3rd edition is thoroughly revised and updated throughout and features new chapters on the neuropsychology of toxic exposures health and the psychology of environmental stress and developmental psychology It offers a comprehensive review of literature in various subdisciplines demonstrating the wide applicability and relevance of psychology for addressing imminent environmental threats Like both previous editions the book s tone is widely accessible and engaging and no previous background in psychology or environmental science is assumed or required The use of personal examples and cartoons help engage the reader The 3rd edition is also accompanied by online resources for instructors The Psychology of Environmental Problems Psychology for Sustainability 3rd Edition can be used as a primary or secondary textbook on a wide range of courses in Ecological Psychology Environmental Science Sustainability Sciences Environmental Education and Social Marketing It also provides a valuable resource for professional audience of policymakers legislators and those working on sustainable communities

Our Global Environment Anne Nadakavukaren, 2011-02-28 The crucial interdependence between humans and their environment is explored and illuminated in this revealing overview of the major environmental issues facing society in the twenty first century With attention to detail and cogent language the author describes how human health and well being are inextricably bound up in the web of interrelationships that characterize life on this planet The presentation combines an overall ecological concern with specific elements related to personal and community health giving readers a clear sense of how todays environmental issues directly impact their own lives New to the seventh edition is a chapter on clean energy alternatives that evaluates the long term potential of the most promising renewable energy technologies as well as short term strategies to increase energy efficiency The discussion of global climate change has been significantly updated to reflect the latest assessments of the Intergovernmental Panel on Climate Change with regard to evidence of global warming mitigation strategies and adaptation measures as well as an up to date summary of ongoing international efforts to negotiate binding treaties that would produce meaningful reductions in greenhouse gases Our Global Environment is widely praised by students and faculty for its clear compelling presentation Abundant photographs and illustrations highlight salient issues and clarify trends while boxed inserts in every chapter contain timely examples of general concepts presented in the chapters

Environmental Studies B. S. Chauhan, 2008-05 This book is intended to meet the academic requirements of the subject Environmental Studies for undergraduate students in Indian and overseas universities The contents have been prepared keeping in mind the widest possible variations in the background of the users The entire UGC syllabus and supplementary materials are in the nine chapters Chapter 1 describes the multidisciplinary nature of environmental studies Chapter 2 and 3 comprehensively elaborate the forest water minerals food energy and land resources Chapter 4 explains

various aspects of biodiversity Chapter 5 discusses the science of ecology and concepts of ecosystem Chapter 6 is an exhaustive description of environmental pollution its sources effects and control measures The sustainable development has been discussed in Chapter 7 Issues on environment and health human rights AIDS women child welfare and role of IT industry have been addressed in great length in Chapter 8 Key features of this book include authentic simple to the point and latest account of each and every topic besides well sketched illustrations and various case studies The book also contains glossary of terms which can be of particular use to students with little or no science background and appendices and abbreviations commonly used in describing environmental studies

The Educational Challenge of Cultural Diversity in the International Context Christos Govaris, Stavroula Kaldi (ed.),2010 The book contributes to the promotion of intercultural scientific discourse concerning the issue of managing the worldwide common challenge of cultural diversity in different education systems Considering the diversity in the school student population as an educational challenge the aim of this volume is to present theoretical and research works associated to the scientific discourse about intercultural education and its importance to education on a national level and to the educational policies regarding school integration of pupils with immigrant background in different education systems The examples about the effective management of diversity of student population on a national level and the open scientific questions that are presented can contribute to broaden our perspective regarding the width both of dimensions of this educational challenge and of the possibilities to manage the diversity of student population effectively

Power and Inequality Levon Chorbajian,2021-05-30 Successfully bringing together accessible readings that cover the broad range of issues of importance to those studying politics and society this new edition of *Power and Inequality* provides a unique mix of theoretical and empirical pieces such as state and electoral politics that address both classic issues in political sociology and more recent developments such as globalization With strong integration of race and gender throughout this collection offers a coherent analysis of power that reflects the contributions of a variety of critical perspectives including Marxism feminism critical race theory postmodernism and power structure theory

Using the Agricultural, Environmental, and Food Literature Barbara S. Hutchinson,Antoinette Paris-Greider,2002-07-17 This reference provides the groundwork tools and terminology required when conducting specialized searches for information and resources pertaining to traditional and emerging fields of agriculture The editors present 16 contributions from librarians and other information workers that offer information on research resources across the academic a

Problem-Solving Exercises in Green and Sustainable Chemistry Albert S. Matlack,Andrew P. Dicks,2015-11-05 When confronted with a problem in science the way to proceed is not always obvious The problem may seem intractable or there may be many possible solutions with some better than others Problem Solving Exercises in Green and Sustainable Chemistry teaches students how to analyze and solve real world problems that occur in an environmental context
