Environmental Economics Canadian Edition Test Bank:

Trade and the Environment Brian R. Copeland, M. Scott Taylor, 2013-12-03 Nowhere has the divide between advocates and critics of globalization been more striking than in debates over free trade and the environment And yet the literature on the subject is high on rhetoric and low on results This book is the first to systematically investigate the subject using both economic theory and empirical analysis Brian Copeland and Scott Taylor establish a powerful theoretical framework for examining the impact of international trade on local pollution levels and use it to offer a uniquely integrated treatment of the links between economic growth liberalized trade and the environment The results will surprise many The authors set out the two leading theories linking international trade to environmental outcomes develop the empirical implications and examine their validity using data on measured sulfur dioxide concentrations from over 100 cities worldwide during the period from 1971 to 1986 The empirical results are provocative For an average country in the sample free trade is good for the environment There is little evidence that developing countries will specialize in pollution intensive products with further trade In fact the results suggest just the opposite free trade will shift pollution intensive goods production from poor countries with lax regulation to rich countries with tight regulation thereby lowering world pollution The results also suggest that pollution declines amid economic growth fueled by economy wide technological progress but rises when growth is fueled by capital accumulation alone Lucidly argued and authoritatively written this book will provide students and researchers of international trade and environmental economics a more reliable way of thinking about this contentious issue and the methodological tools with which to do so *Faithful Economics* James W. by mildly rising inequality within countries and a widening gap between richer economies and the poorest economies Increasingly the development agenda in the region with its focus on growth jobs and social stability and the trade policy agenda with its focus on market access and competitiveness have become intertwined East Asian policymakers seek to develop a coherent set of economic policies that can deliver stability growth and regional integration Without attempting to be comprehensive East Asia Integrates offers fundamental strategies that promote cross border flows of trade along with domestic policies on logistics trade facilitation standards and institutions to maximize the impact of these flows on development and distribute the gains from trade widely As the authors demonstrate multilateral and regional trade initiatives must provide a compelling vision of how integration can deliver broadly shared growth and prosperity if they are to succeed In addition they must use the momentum offered by trade agreements to address the links between trade on the one hand and social stability poverty reduction and growth on the other
