While the Business Process Management (BPM) module contains actions that address typical business needs, you may have additional requirements specific to your organization or industry. To handle these unique situations, you can customize BPM method, data, and updatable BAQ directives.

[Business Process Management Utilities](#)

Various utilities are available in the Business Process Management (BPM) module to help you:

[Global Alerts](#)

Global alerts are messages you activate to help specific users track data activity.

[Dashboards](#)

Dashboards are flexible, powerful tools that provide easy access to critical information in a real-time environment. In addition to the standard dashboards included with the application, you can also create custom dashboards. Custom dashboards can replace the need for workbenches, trackers, ShopVision reports, ad hoc reports, and even simple business intelligence reports.
