Tigrinya Asa Qwadza and Ikalanga      **The New Constitutional Law of Kenya. Principles, Government and Human Rights** Kiwinda Mbondenyei, Osogo Ambani, 2012 The golden thread that cuts across the various chapters of the book is the emphasis that good constitutions anchor certain tenets that have garnered recognition as hallmarks of democratic dispensation These hallmarks include the concept of separation of powers the doctrine of the rule of law constitutionalism and human rights These attributes have largely been secured by the 2010 Constitution Thus this book is expected to contribute to this new promise by making knowledge on the Constitution accessible through breaking down and contextualising its provisions It is certain to be useful to law and government students lawyers researchers and other persons who seek to understand the new constitutional order      *Developing Africa's Financial Services* Dana T. Redford, 2017-05-11 Financial services are an essential element in powering entrepreneurial activity beyond resource extraction in Africa This book examines the macro trends and highlights inspiring success stories of entrepreneurial financial sector ventures that are making a lasting contribution to the economic development of various sub Saharan African countries      **Foundations of Education** E.O. Adu, M. P. Mavuso, N. S. Duku, C. C. Wolhuter, 2022-10-10 Many aspiring trainee teachers enter the field of education intending to positively impact students lives However to be an effective educator one must have a solid grounding in the fundamental principles of teaching This is where a book on the foundations of learning is invaluable      Thus Until Emilia Ilieva, Reuben Matheka, 2025-08-04 Thus Until A History of Egerton University is a thorough historical chronological and well researched account of Egerton University from a whites only college when it started in 1939 through to the expansion it has experienced over the years culminating in being a full university More than any other university in Kenya Egerton has a long and colourful history but like all the other universities it has suffered from the political economic and financial challenges of the time especially since the double intake of the 1990s Chapter One provides the required background to the study highlighting agricultural and educational policies and steering away from the Happy Valley hype so characteristic of the period The reader will learn about the Egerton family in Chapter Two and particularly about Lord Egerton himself and the colonial circumstances within which he lived The chapter dispels some of the popularly held myths about him Chapter Three deals with the beginnings of the college and the various structural and curriculum experiments tried out and the kind of enrolment and students it experimented with as an all white establishment The chapter ends with Africans beginning to agitate for change With great attention to detail the later chapters put the university in a broader local and international context thereby increasing its relevance to society A History of Egerton University though heavily footnoted and with a detailed bibliography is written in a simple easy flowing and accessible style      **Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems** Mani, Nandita S., Cawley, Michelle A., 2022-05-06 Beyond providing space for data science activities academic libraries are often overlooked in the data science landscape that is emerging at academic research institutions Although some academic libraries are collaborating in specific ways in a small

subset of institutions there is much untapped potential for developing partnerships As library and information science roles continue to evolve to be more data centric and interdisciplinary and as research using a variety of data types continues to proliferate it is imperative to further explore the dynamics between libraries and the data science ecosystems in which they are a part The Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems provides a global perspective on current and future trends concerning the integration of data science in libraries It provides both a foundational base of knowledge around data science and explores numerous ways academicians can reskill their staff engage in the research enterprise contribute to curriculum development and help build a stronger ecosystem where libraries are part of data science Covering topics such as data science initiatives digital humanities and student engagement this book is an indispensable resource for librarians information professionals academic institutions researchers academic libraries and academicians
