Palliative Care Nursing Marianne Matzo, Deborah Witt Sherman, 2006 Annotation Offering a blend of holistic and humanistic caring coupled with aggressive management of pain and symptoms associated with advanced disease this resource is organized around 15 competencies in palliative care developed by the American Association of Colleges of Nursing with each chapter outlining

specific skills needed to achieve each competency *Slope Stability and Erosion Control: Ecotechnological Solutions* Joanne E. Norris, Alexia Stokes, Slobodan B. Mickovski, Erik Cammeraat, Rens van Beek, Bruce C. Nicoll, Alexis Achim, 2008-02-29 This chapter describes the processes involved in the transport of material over hillslopes Hillslopes provide the gradients enabling material to be transported from the slopes themselves towards the valley bottoms directly by gravity alone or by water flowing down over the surface Gravity has the potential to transfer material downslope if the material resistance to counteract it is insufficient Similarly water and wind flowing along the surface exert a drag on soil particles and have the potential to entrain material After the gradient has fallen below a critical threshold to keep the material in transport deposition occurs Conventionally slope processes in which gravity alone is the dominant transporting agent are called mass movements Brunsden 1984 Processes in which other agents dominate are called erosion e.g. wind or water erosion Flowing water is an important transporting agent on which the emphasis is placed here Although mass wasting is a natural process its incidence and impact may be exacerbated by human activities Crozier 1986 Morgan 2005 A situation may ultimately arise in which human interests become unsafe or unsustainable This impact is not only directly felt in the areas where material is removed or deposited and indirectly mass wasting may have an effect on soil and water quality in areas located further downstream In the following sections a brief overview is given of the mechanisms morphology causes and consequences of mass movements and erosion Geographic Information Systems: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2012-09-30 Developments in technologies have evolved in a much wider use of technology throughout science government and business resulting in the expansion of geographic information systems GIS is the academic study and practice of presenting geographical data through a system designed to capture store analyze and manage geographic information Geographic Information Systems Concepts Methodologies Tools and Applications is a collection of knowledge on the latest advancements and research of geographic information systems This book aims to be useful for academics and practitioners involved in geographical data **Public Health Skills** Lesley Coles, Elizabeth Porter, 2009-01-26 Nurses and other public health practitioners have a crucial role to play in helping to improve the collective well being of society and so developing skills in public health preventing disease prolonging life and promoting health is key to this process Public Health Skills A practical guide for nurses and public health practitioners covers the complete spectrum of public health practice the effective assessment and management of need understanding policy and how to affect its implementation before moving on to explore practical issues and themes surrounding the facilitation of public health Within the four sections of the book the text is organised around the ten core public health skills outlined in the National Occupational Standards for the practice of public health covering skills including surveillance and assessment collaborative working working with communities strategy development risk management leadership and ethics Public Health Skills A practical guide for nurses and public health practitioners provides the fundamental essential knowledge and skills required
