Education Mania Joshua

Flapan, 2023 Education Mania Is a University The New Doctor is about people who think that a college degree is a real degree In fact the doctorate is doing the goals of the college In many ways the full benefits of a college degree go to the doctorate Like in the majors in the field of engineering psychology and English there are a lot of college grads around the world who face the food stamp line and it is contrary to how the university gets people a job The scandal involves an essay and dissertation That is an approximately five chapter essay Also the book has introductions to explain to the reader how a university degree becomes a new doctor My book explores solutions to subject areas that prove the doctor is the new college

The solutions include having college to nothing getting rid of the bus child labor and apprentices **Proceedings of the XIV INTERNATIONAL SYMPOSIUM SYMORG 2014** Aleksandar Marković, Slađana Barjaktarović Rakočević, 2014-06-05

Rules on Paper, Rules in Practice Edouard Al-Dahdah, Cristina Corduneanu-Huci, Gael Raballand, Myriam Ababsa, Ernest Sergenti, Anya Vodopyanov, 2016-07-25 The primary focus of this book is on a specific outcome of the rule of law the practical enforcement of laws and policies and the determinants of this enforcement or lack thereof Are there significant and persistent differences in implementation across countries Why are some laws and policies more systematically enforced than others Are good laws likely to be enacted and if not what stands in the way We answer these questions using a theoretical framework and detailed empirical data and illustrate with case studies from Morocco Tunisia and Jordan We believe that the best way to understand the variation in the drafting and implementation of laws and policies is to examine the interests and incentives of those responsible for these tasks policymakers and bureaucrats If laws and their enforcement offer concrete benefits to these ruling elites they are more likely to be systematically enforced If they don t implementation is

selective discretionary if not nil Our first contribution is in extending the application of the concept of the rule of law beyond its traditional focus on specific organizations like the courts and the police to economic sectors such as customs taxation and land inheritance in a search for a direct causal relationship with economic development outcomes Instead of limiting ourselves to a particular type of organization or a legalistic approach to the rule of law we present a broader theory of how laws are made and implemented across different types of sectors and organizations Our second contribution is in demonstrating how powerful interests affect implementation outcomes The incentives elites have to build and support rule of law institutions derive from the distribution of power in society which is partly a historical given The point we make is that it is not deterministic Realigning the incentive structures for reform among key actors and organizations through accountability and competition can dramatically improve the chances that rule of law institutions will take root On the other hand building the capacity of organizations without first changing institutional incentives is likely to lead to perverse outcomes
