Schmidt,S. Raizen,E.D. Britton,Leonard J. Bianchi,Richard G. Wolfe,2008-04-06 PREFACE The Third International Mathematics and Science Study

TIMSS sponsored by the International Association for the Evaluation of Educational Achievement IEA and the governments of the participating countries is a comparative study of education in mathematics and the sciences conducted in approximately 50 educational systems on six continents. The goal of TIMSS is to measure student achievement in mathematics and science in participating countries and to assess some of the curricular and classroom factors that are related to student learning in these subjects. The study is intended to provide educators and policy makers with an unparalleled and multidimensional perspective on mathematics and science curricula, their implementation, the nature of student performance in mathematics and science, and the social, economic, and educational context in which these occur. TIMSS focuses on student learning and achievement in mathematics and science at three different age levels or populations. Population 1 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 9-year-old students. Population 2 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 13-year-old students, and Population 3 is defined as all students in their final year of secondary education, including students in vocational education programs. In addition, Population 3 has two specialist subpopulations: students taking advanced courses in mathematics (mathematics specialists) and students taking advanced courses in physics (physics specialists).

Science Education in East Asia Myint Swe Khine, 2015-09-03. This book presents innovations in teaching and learning science, novel approaches to science curriculum, cultural and contextual factors in promoting science education, and improving the standard and achievement of students in East Asian countries. The authors in this book discuss education reform and science curriculum changes and promotion of science and STEM education, parental roles and involvement in children's education, teacher preparation and professional development, and research in science education in the context of international benchmarking tests to measure the knowledge of mathematics and science, such as the Trends in Mathematics and Science Study (TIMSS) and achievement in science, mathematics, and reading like Programme for International Student Assessment (PISA). Among the high-achieving countries, the performance of the students in East Asian countries such as Singapore, Taiwan, Korea, Japan, Hong Kong, and China, Shanghai, are notable. This book investigates the reasons why students from East Asian countries consistently claim the top places in each and every cycle of those studies. It brings together prominent science educators and researchers from East Asia to share their experience and findings, reflection, and vision on emerging trends, pedagogical innovations, and research-informed practices in science education in the region. It provides insights into effective educational strategies and development of science education to international readers.

Multilingual Learning and Language Supportive Pedagogies in Sub-Saharan Africa Elizabeth J. Erling, John Clegg, Casmir M. Rubagumya, Colin Reilly, 2021-07-01. This edited collection provides unprecedented insight into the emerging field of multilingual education in Sub-Saharan Africa (SSA). Multilingual education is claimed to have many benefits, amongst which are that it can improve both content and language learning, especially for learners who may have low ability in the medium of instruction and are consequently struggling to learn. The

book represents a range of Sub Saharan school contexts and describes how multilingual strategies have been developed and implemented within them to support the learning of content and language It looks at multilingual learning from several points of view including translanguaging or the use of multiple languages and especially African languages for learning and language supportive pedagogy or the implementation of a distinct pedagogy to support learners working through the medium of a second language The book puts forward strategies for creating materials classroom environments and teacher education programmes which support the use of all of a student s languages to improve language and content learning The contexts which the book describes are challenging including low school resourcing poverty and low literacy in the home and school policy which militates against the use of African languages in school The volume also draws on multilingual education approaches which have been successfully carried out in higher resource countries and lend themselves to being adapted for use in SSA It shows how multilingual learning can bring about transformation in education and provides inspiration for how these strategies might spread and be further developed to improve learning in schools in SSA and beyond Chapter 3 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>
