Congress. House. Committee on Appropriations. Subcommittee on Energy and Water Development, 2013 Civil Case Management in the Twenty-First Century: Court Structures Still Matter Peter C.H. Chan, C.H. van Rhee, 2021-02-15 The information age provides novel tools for case management While technology plays a crucial role the way in which courts are structured is still critical in ensuring effective case management The correlation

between court structure and case management is a pivotal topic. The existing debate concentrates predominantly on the micro and case specific aspects of case management without further inquiry into the relationship between court structure, court management and case management. The contributions within this volume fill this gap from a comparative perspective undertaking a macro structural and sub macro perspective of procedure and case management. **Introducing Needs**

Introducing Needs Analysis and English for Specific Purposes is essential reading for pre service and in service teachers and students studying English for Specific Purposes. Applied Linguistics, TESOL and Education. **The Routledge Handbook of**

US Foreign Policy in the Indo-Pacific Oliver Turner, Nicola Nymalm, Wali Aslam, 2022-12-30. This handbook provides a comprehensive survey of US foreign policy throughout the Indo Pacific. Home to around 60 percent of the world's population, most of the world's largest and fastest growing economies, around half of the world's states with full nuclear capabilities and a complicated web of unresolved tensions, disputes and conflicts, the Indo Pacific is arguably the most diverse, dynamic and contested region on Earth. US strategy there has evolved over centuries with its physical presence going broadly unchallenged since at least the middle of the last century. However, the rapid development and expanding influence of China alongside the growth of India, Indonesia, Vietnam, the Philippines and others, as well as political and economic crises and disruptions within the United States itself, mean that in recent times the US has come to occupy a newly uncertain position and perceive a range of highly unfamiliar challenges. To explore how the US has managed and continues to manage its regional history and how it approaches the modern day landscape of an Indo Pacific only recently normalised within international political discourse, the book contains 33 newly commissioned chapters from leading experts in the field. It does so partly with help from the more traditional realms of International Relations theory as well as more critical realms. It also unpacks US policy and strategy as it pertains to regional governments, states and multilateral institutions as well as to pressing issues including inter state security, human rights, trade, artificial intelligence and cyber strategy. It does so in four parts: History of the US in the Indo Pacific; Theorising US Policy and Presence in the Indo Pacific; The US and Indo Pacific States and Institutions; The US and Indo Pacific Issues. The book is designed to be of interest to students and scholars of the US in the Indo Asia Pacific, the international relations of the Indo Asia Pacific and US foreign policy. **The Real Cyber War**

Shawn M. Powers, Michael Jablonski, 2015-03-15 Contemporary discussion surrounding the role of the internet in society is dominated by words like internet freedom surveillance cybersecurity Edward Snowden and most prolifically cyber war Behind the rhetoric of cyber war is an on going state centered battle for control of information resources Shawn Powers and Michael Jablonski conceptualize this real cyber war as the utilization of digital networks for geopolitical purposes including covert attacks against another state's electronic systems but also and more importantly the variety of ways the internet is used to further a state's economic and military agendas Moving beyond debates on the democratic value of new and emerging information technologies The Real Cyber War focuses on political economic and geopolitical factors driving internet freedom policies in particular the U S State Department's emerging doctrine in support of a universal freedom to connect They argue that efforts to create a universal internet built upon Western legal political and social preferences is driven by economic and geopolitical motivations rather than the humanitarian and democratic ideals that typically accompany related policy discourse In fact the freedom to connect movement is intertwined with broader efforts to structure global society in ways that favor American and Western cultures economies and governments Thought provoking and far seeing The Real Cyber War reveals how internet policies and governance have emerged as critical sites of geopolitical contestation with results certain to shape statecraft diplomacy and conflict in the twenty first century **Transparency,**

Society and Subjectivity Emmanuel Alloa, Dieter Thomä, 2018-06-22 This book critically engages with the idea of transparency whose ubiquitous demand stands in stark contrast to its lack of conceptual clarity The book carefully examines this notion in its own right traces its emergence in Early Modernity and analyzes its omnipresence in contemporary rhetoric Today transparency has become a catchword outplaying other Enlightenment values like empowerment sincerity and the notion of a public sphere In a suspicious manner transparency is entangled in the discourses on power surveillance and self exposure Bringing together prominent scholars from the emerging field of Critical Transparency Studies the book offers a map of the various sites at which transparency has become virulent and connects the dots between past and present By studying its appearances in today's hyper mediated economies of information and by linking it back to its historical roots the book analyzes transparency and its discontents and scrutinizes the reasons why it has become the imperative of a supposedly post ideological age **Advances in Human Aspects of Transportation: Part II** Neville Stanton, Steven Landry, Giuseppe Di Bucchianico, Andrea Vallicelli, 2021-07-19 Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation

awareness skill development and training warnings and workload This book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system

The BRICS Andrew F. Cooper, 2016-04-28 In the wake of the post Cold War era the aftermath of 9 11 the 2008 global financial crisis and the emergence of the G20 at the leaders level few commentators expected a reshaping of the global system towards multipolarity and away from the United States And yet the BRICS encompassing Brazil Russia India China and South Africa has emerged as a challenge to the international status quo But what is its capacity as a transformative force And can it provide a significant counter narrative to the Western dominated global order In this Very Short Introduction Andrew Cooper explores the emergence of the BRICS as a concept Drawing on historical precedent Cooper provides a contemporary analysis of the BRICS practice and influence as as a forum and a lobby group in advancing a distinctive but amorphous agenda amongst global politics
