vulnerability of consumers in the very ordinary activity of purchasing food Although the creation of the European Food Safety Authority EFSA in February 2002 can be viewed as an EU response to this crisis it in fact represents an inevitable milestone in a body of food specific European legislation and case law that has been growing for many years The EFSA does however clearly establish food law as an autonomous branch of EU law This is the first book to survey and analyse this body of law in depth drawing together the relevant laws and cases and taking stock of the trends and likely future developments in this dynamic and emotive area of law and policy elucidates the scope of European food law by investigating several avenues and facets of the subject including the following its underpinnings in Article 3 of the EC Treaty on the free movement of goods the principle of mutual recognition among Member States case law developments concerning composition of foodstuffs labelling sales promotion advertising and other aspects of food production and distribution aims and policies of the January 2000 White Paper on Food Safety issued by the European Commission appropriate hygiene standards and authorisation and labelling of GMOs Because food is such a central and essential element in society food law has far reaching economic social and environmental consequences And because Europe's new food safety regime is intended by an extraordinary unanimity of Member States and major political groups to be the most up to date and effective in the world a broad range of legal practitioners and scholars social scientists and policymakers will greatly appreciate this thoroughgoing and insightful analysis
