

T-26 Light Tank (Single Turret)

The next version of the T-26 was the Model 1933, which introduced several key modifications. The most obvious difference was that in this design the twin turrets were replaced by a large, centrally-positioned single turret.

T-26 Model 1933

The Model 1933 featured a single large two-man rotating turret with a rear-positioned rectangular storage bin. The turret mounted a high-velocity 20 mm (7.87 in) Model 1933 (also Model 1934) cannon. The gun produced a high muzzle velocity of 800m/s (2700ft/s), enhancing the Model 1933's ability. Some 150 models for the main gun were housed in the vehicle. The turret also mounted a standard DT machine gun on each side.

Some late Model 1933 tanks had a second machine gun mounted on a large external anti-aircraft housing on the turret rear, while other vehicles featured a third rear-mounted DT machine gun on the turret rear. The T-26M Model 1935, the command variant, featured a distinctive horseshoe-shaped rail antenna mounted around the turret top edge. Some 1400 Model 1933s were built during 1933-35.

T-26 Model 1933

The large single turret with long-barreled 20mm 21P gun distinguished the Model 1933 tank for production.

T-26 Model 1935

As Model 1933 production unfolded the Soviets introduced minor improvements that simplified production, thus creating the new Model 1935. This variant featured the improved 20A Model 1934 gun. The turret anti-aircraft ability was enhanced by most vehicles.

Mounting three DT machine guns, the standard anti-air weapon, a second 50mm mounted one on the turret rear and a third housed in an anti-aircraft mount on the rear turret roof. Model 1935 tanks also featured two nighttime searchlights atop the gun mantlet, while some vehicles also featured a wireless radio and steel-driven road wheels. Hiding hatches were used on parts of the vehicle instead of hosing.

T-26 Model 1935

The most updated T-26 was the Model 1935, which featured a telescoped central turret. While this had the same 20mm (7.87 in) gun as previously the

MODEL 1933 AND PRODUCTION CHANGES

As with many of their tanks, the Soviet factories producing the T-26 incorporated modifications to the Model 1933 during its production run without creating a new year designated model. Late Model T-26 Model 1933s, for example, featured a new enlarged fuel tank that held 200 liters (54 gal) of petrol rather than the previous 140 liter (36 gal) size. This modification extended the tank's maximum forward operational range to 220km (140 miles).

Turret's side plates were sloped, thus enhancing the tank's survivability, but to avoid making the design any heavier, and thus overloading the G24-120 engine, the Model 1935 retained the Model 1933's hub. This variant also featured an improved version of the 20mm 21P gun, the Model 1935, along with enhanced optical equipment. Factory 174 at Leningrad produced 800 Model 1935 tanks.
