

How to look After Phasmids

What is a Phasmid?

A phasmid is also known as a stick insect. They look like a group of sticks stuck together. This makes it easy for them to hide. They try to copy their environment and look like the trees or bushes they live in so they are often green or brown. Phasmids can also have stripes or patterns to help them hide. They can live up to three years in the wild, but usually only live for about six to one and a half years. They are herbivores, which means they eat plants only.

How to Set Up Their Environment

Phasmids need a large enclosure or box to live in with lots and lots of space to move around. You could use an old fish tank with a net on top to stop them getting out. This is also a good idea because phasmids like to be warm and have a humid environment and the tank will keep the air warm. You need to put some newspaper on the bottom and add some wood or dirt over the paper. Sometimes, a special enclosure can be made using rolls. If you are going to do this, you need to make sure they cannot get out! If you want to keep them for a long time, you can buy a special enclosure for your pet phasmid.

How to look After Phasmids

Feeding

Phasmids like to eat plants, mostly leaves from your trees. You need to change the leaves in their enclosure often so they are always new and fresh. Make sure to choose healthy leaves as your phasmid does not get sick. When you are putting the branches of leaves into the enclosure, you will need to put the end into a little tub of water to keep the leaves as fresh as you can.

Phasmids drink little droplets of water from the leaves in their enclosure. You can use a spray bottle to spray the leaves a number of times throughout the day. Sometimes they will hang upside down on the bottom of a leaf and may not eat very much. If they do this, they are getting ready to shed their skin.

Keeping the Environment Clean

Just like all pets, you will need to clean out the tank or enclosure where your phasmid live. There are a few different ways to do this.

First, you will need to change the leaves and branches. The best way to do this is to have two different sets of branches and two tubs of water. Change one set at a

time, only so the phasmids have somewhere safe to stay while you are working. You do not want to throw your pet away with the old branches! You can always change the second tub and branches later in the week.

How to look After Phasmids

Check to make sure that you have collected all of your phasmids from the old branches before you throw them away. You also need to check the new branches to make sure that there are no other creatures living on them. Phasmids do not want any other friends that could hurt them.

You also need to clean out the bottom of their environment. This includes wiping the glass or plastic parts with water and a cloth. Do not use any cleaning sprays or detergents as they can make phasmids sick. Replace the old newspaper and wood with new newspaper and new wood, then put the tubs of water and branches back into the enclosure.

Handling the Phasmid

Phasmids are easy to hold. The trick is to let the phasmid walk and climb on you so you do not hurt them. Sometimes they will need a very gentle push to get them moving. When you are holding, they are telling you that they are scared. If this happens, put them back in their enclosure or leave them where they are to settle down.
