Handbook Of Tourism And Quality Of Life Research:

Handbook of Tourism and Quality-of-Life Research II Muzaffer Uysal, M. Joseph Sirgy, 2023-09-23 The second volume of this handbook develops on and extends the discussion in the successful first volume published in 2012. This is a timely addition to the literature drawing on the momentum that quality of life (QOL) research in tourism has gained in the 21st century and on the boom in the tourism industry itself. It focuses on four areas of growth in QOL research in the recent past: 1. travelers/tourists, 2. host communities, 3. service providers, and 4. the role of technology. The handbook helps management of tourism firms and policy makers develop specific policies and programs to ensure the most positive impact of tourism on tourists, host communities, and service providers. The comprehensive coverage of topics in this handbook makes it a state-of-the-art reference. Academics interested in QOL research in travel and tourism, tourism practitioners interested in applying the science of QOL in the tourism industry, as well as policy makers involved in regulating the industry, will view the handbook as an indispensable source of recent research.

This handbook covers all relevant topics and is divided into two parts: research relating to travelers/tourists and research relating to the residents of host communities. It is the only state-of-the-art reference book in its field and will prove invaluable to academics interested in QOL research, as well as tourism practitioners interested in applying the science of QOL in the tourism industry.

Sustainable Development and Resilience of Tourism Deepak

Chhabra, Navin Atal, Alka Maheshwari, 2024-08-29 This volume examines progress in sustainable and resilient development of niche forms of tourism from a health and wellbeing perspective. It also aims to offer deep and innovative insights on the supporting role of non pharmaceutical interventions to enhance resilience and wellbeing of visited and visiting communities. A comparative and critical discourse of the role of hard medicine is also offered from both a core and supplementary perspective particularly from eudaimonic and physiologically restorative standpoints. Furthermore indigenous non pharmaceutical interventions and spiritual healing mechanisms are discussed in the context of their potential to facilitate long term immunity and happiness. The book conceptually situates health as a fourth pillar of sustainability and examines its role in stimulating long lasting transformations rooted in positive psychology, inner transformation and sustainable consumption of organic products and services. It designs an evolving transformational Quality of Life paradigm that strengthens the foundations of health wellbeing based sustainable development initiatives and resilience of tourism systems. The work will be of interest to academic, professional and various public and private stakeholders of tourism such as destination marketing organizations, policy makers, hospitality industries, tour operators, host communities, NGOs and government agencies.

The Psychology of Quality of Life M. Joseph Sirgy, 2021-06-09 The third thoroughly revised and enhanced edition of this bestselling book analyses and discusses the most up to date research on the psychology of quality of life. The book is divided into six parts. The introductory part lays the philosophical and academic foundation of much of the research on wellbeing and positive mental health, showing the beneficial effects of happy people at work, health and to society at large. Part 2, effects of objective reality, describes how sociocultural factors, income factors, other demographic factors and biological and health conditions affect wellbeing and positive mental health. Part 3 focuses on subjective reality and discusses how individuals process information from their objective environment and how they manipulate this information that affects wellbeing and positive mental health. Part 4 focuses on the psychology of quality of life specific to life domains while Part 5 reviews the research on special populations: children, women, the elderly but also the disabled, drug addicts, prostitutes, emergency personnel, immigrants, teachers and caregivers. The final part of the book focuses on theories and models of wellbeing and positive mental health that integrate and unify disparate concepts and programs of research. The book addresses the importance of the psychology of quality of life in the context of public policy and calls for a broadening of the approach in happiness research to incorporate other aspects of quality of life at the group, community and societal levels. It is of topical interest to academics, students and researchers of quality of life, wellbeing research, happiness studies, psychotherapy and social policy.
