

DESCRIPTION of the MACHINE

The front frame carries the driver's cab and the master equipment, and is mounted to the rear frame by a center pivot. The rear frame carries the engine transmission assembly and the hydraulic oil tank.

The machine is equipped with a high precision, zero-clear, hydro steering unit which, even at low speeds, provides sufficient oil flow for effortless steering across rough terrain. An emergency steering pump allows the machine to be steered with the engine switched off as well as forward. Two steering hydraulic cylinders, situated in the region of the center pivot, provide for a precise and responsive steering of the machine.

The machine is powered by a water cooled, direct injection, exhaust gas turbo-charged diesel engine providing outstanding performance coupled with reliability and economy. The engine lubrication system guarantees adequate lubrication of all engine components even when operating on steep gradients.

The torque converter and full powershift transmission provide maximum torque and providing forces at low speeds used when digging and loading, smooth full time gear changing and reversing, even at full engine load.

Drive from the powershift transmission to the front and rear axles is via universal jointed propeller shafts. The front and rear axles are equipped with torque proportioning differentials as standard equipment. The front axle is linked directly to the front frame; the rear axle is freely mounted on the rear frame and is free to rotate.

The service brake is a compressed-air over hydraulic, dual circuit braking system with disc brakes acting on all four wheels.

The master equipment, with cross-over linkage geometry makes full use of the two-stage master hydraulic system. When digging or unloading the bucket, oil pressure acts upon the head end of the cylinder piston for tremendous digging force, on the other hand, when dumping the bucket, oil pressure acts upon the tail end end of the cylinder. This reversal of forces results in the bucket being emptied faster for longer work cycles.

Maneuverability and a large profile identify the sight of this wheeled loader.
