

CONVERSION EQUIPMENT

Conversion equipment is supplied with the Henschel complete for various makes of trucks which reduces cost and time in changeover.

The HENSCHEL Diesel Engine Type 512 DG, 6 cylinders, 95 h.p. is profitable for the operator of G.M.C. and other trucks who aims at lower fuel costs. Converting his petrol engined truck by putting a Henschel Diesel in the place of the original engine, he lowers consumption from about 10 gallons of petrol to 5½ gallons of fuel oil. Conversion is easy because it entails no essential alterations of the chassis, cooler, steering gear, gearbox and brake system remain unchanged.

LANOVA SYSTEM

The engine embodies the well known Lanova system adopted by many Diesel engine manufacturers. Lanova implies smoother power which is a result of the progressive combustion characteristic for this system. Peak pressures are avoided and wear of the mechanism is reduced. Gas/oil/air mixture and combustion are next to perfect and consumption is thus lowered to a minimum.

AMPS From the early days of World War II it was clear that the Wehrmacht's antitank units would need to be motorized as
existing horse or automobile drawn units were too slow to be effective Initially antitank guns were mounted onto available
usually obsolete tank chassis such as the Panzerjäger I and II However German engineers would soon turn to the heavy
chassis of the Panzer IV the Panther and the Tiger for their tank hunters It became apparent during the invasion of France
that enemy antitank guns were both more powerful and better armored and improvement became a priority during
Barbarossa as German units faced off against the new Soviet tanks The appearance of the Soviet T 34 in July 1941 meant that
the Germans had to quickly come up with something equally powerful The result was the motorized panzerjäger faster and
more mobile than older towed versions This was followed in 1942 by the introduction of the 7.5cm gun Further designs and
modifications were informed by reports from the front line Some of these conversions were very successful and resulted in
fearsome tank destroyers deployed to great effect by the Wehrmacht The lightweight Hetzer for example was based on a
modified Panzer 38 t and entered service in 1944 This small tank became Germany's main tank destroyer during the final
stages of the war and would continue in use around the world even after 1945 Though they may not have looked that
intimidating the Landsers were soon won over and were comforted to have something reliable to stand between them and the
Soviet tanks This account illustrated by hundreds of period photos examines the development and deployment of various
