Urban Ecology Philip James, Ian Douglas, 2023-12-22 This fully revised second edition reflects the great expansion in urban ecology research action and teaching since 2015. Urban ecology provides an understanding of urban ecosystems and uses nature based techniques to enhance habitats and alleviate poor environmental conditions. Already the home to the majority of the world's people, urban areas continue to grow causing ecological changes throughout the world. To help students of all professions caring for urban areas and the people, animals and plants that live in them, the authors set out the environmental and ecological science of cities, linkages between urban nature and human health, urban food production in cities and how we can value urban nature. The authors explore our responsibilities for urban nature and greening, ecological management techniques and the use of nature based solutions to achieve a better, more sustainable urban future and ensure that cities can climate change and become more beautiful and more sustainable places in which to live. This text provides the student and the practitioner with a critical scientific overview of urban ecology that will be a key source of data and ideas for studies and for sound urban management.

The political economy of food and nutrition policies Per Pinstrup-Andersen, 1993-01-01 Few nutritionists and economists fully appreciate how the political environment shapes policy and subsequently affects the relevance of their policy recommendations. When governments fail to follow the recommendations of nutritionists and economists and are unable to design and implement cost effective nutrition programs and policies, it is often attributed to politics or to lack of political will on the part of decisionmakers. Past nutrition planning efforts frequently failed to understand the goals and behavior of the various agents and institutions inside and outside the government that in the final analysis

determine whether the planning effort is successful In The Political Economy of Food and Nutrition Policies Per Pinstrip Andersen brings together a group of distinguished authorities to improve the understanding of how nutrition policies are formulated within larger political and economic contexts and how public sector agencies behave with regard to food and nutrition
