- 3 Allie's pen pal Maryse sent her a postcard from France. Unfortunately, it rained on the postcard, and some of the words got smudged. Read the postcard and fill in the appropriate seasons.

Salut de Nantes!
 Qu'est-ce que tu fais pour t'amuser?
En hiver, je fais du
 ski, du patin à glace et du théâtre.
En été, ma famille
 et moi, nous aimons aller à la plage.
 J'adore faire du surf et jouer au volley
 sur la plage! **En automne**,
 quand je rentre au lycée, je fais du
 vélo le matin, avant d'aller au lycée.
 Et toi? Est-ce que tu joues au football
 américain **en automne**?
Au printemps où est-ce que
 tu aimes aller pendant le « Spring Break »?
 À bientôt!
 Maryse

National Aeronautics and Space Administration, 1981 A Meeting with the Universe is the story of what we learned about the universe and ourselves by going into space It is not a textbook for scientists It is written for everyone who shared the excitement and wonder for the last few years students teachers scientists other professional people and curious citizens of all kinds It is not a NASA history It is a history of space exploration by NASA by universities by other government agencies and by industries all of whom have played major roles We have not attempted to apportion credit here space has been studied by many and the discoveries belong to us all The book itself is a novel experiment in writing about science for non scientific readers It was not produced by science writers or journalists but written and edited entirely by a group of NASA scientists all of whom are deeply involved in space science activities and many of whom actively participated in the discoveries they describe We are now at a watershed in space After 20 years of challenging and exciting activity we have done most of the easy things and made most of the obvious discoveries What do we do next How do we tackle the many new questions that have arisen about the Sun the Earth the other worlds the universe around us and ourselves These are not just scientific questions Their answers involve the understanding of the Earth's geology its weather and its climate factors that will affect the survival of our civilization perhaps even of our species Although we have only begun our movement into space we have already traveled far and seen much We have a shining vision of the universe and our future in it Without that vision without the will to follow it something important in us perhaps we ourselves will perish From the preface Dr John E Naugle Chief Scientist NASA
