more than ever the question is Time an ontological property a necessary ingredient for the physical description of the world  
or a purely epistemological element relative to our situation in the world worry physicists and cosmologists alike For many of  
them Relativity and particularly General Relativity as well as its reconciliation with quantum mechanics in the elaboration of  
a quantum theory of gravitation points to a negative answer to the first alternative and leads them to deny the objective

of the unreality of time comes from certain confusions that they denounce and plead for the re establishment of time at the
