The Impact of Networks on Unemployment J. M. Hurst, 2016-10-12. This book investigates why networks, some with joined-up governance, remits appeared ineffective in handling neighbourhood unemployment even in periods when the national unemployment levels dropped. It deploys a multi-theoretical and methodological framework to investigate this empirical puzzle and to test and analyse the causal factors influencing network outcomes. Chapters examine network concepts, network theories, outcome indicators, the historical infrastructure and management of unemployment policy, and governing network trends in post-war urban regeneration interventions. Comparative network case studies offer empirical evidence and a high degree of local variation. Mixed methods, qualitative and quantitative approaches including social network analysis, uncover formal and informal networks, and eighty-six interviews in two English local authorities with persistent unemployment give voice to network practitioner experiences. Findings explain why sub-optimal network outcomes prevail and operational difficulties persist on the ground. Students and academics, professionals and activists can use the results to challenge network governance theories and the policy status quo.

The Wealth of (Some) Nations Zak Cope, 2019-03-20. In this provocative new study, Zak Cope makes the case that capitalism is empirically inseparable from imperialism historically and today. Using a rigorous political economic framework, he lays bare the vast ongoing transfer of wealth from the poorest to the richest countries through the mechanisms of monopoly rent, unequal exchange, and colonial tribute. The result is a polarised international class structure with a relatively rich Global North and an impoverished, exploited Global South. Cope makes the controversial claim that it is because of these conditions that workers in rich countries benefit from higher incomes and welfare systems with public health education.
