M. Alareeni,Islam Elgedawy,2023-08-26 Artificial intelligence AI has the potential to significantly improve efficiency reduce costs and increase the speed and accuracy of financial decision making making it an increasingly important tool for financial professionals One way that AI can improve efficiency in finance is by automating tasks and processes that are time

consuming and repetitive for humans For example AI algorithms can be used to analyze and process large amounts of data such as financial statements and market data in a fraction of the time that it would take a human to do so This can allow financial professionals to focus on higher value tasks such as interpreting data and making strategic decisions rather than being bogged down by mundane tasks AI can also reduce costs in finance by increasing automation and eliminating the need for certain tasks to be performed manually This can result in cost savings for financial institutions which can then be passed on to customers in the form of lower fees or better services AI can be used to identify unusual patterns of activity that may indicate fraudulent behavior This can help financial institutions reduce losses from fraud and improve customer security AI powered chatbots and virtual assistants can help financial institutions provide faster more efficient customer service particularly when it comes to answering common questions and handling routine tasks Some financial institutions are using AI to analyze market data and make trades in real time AI powered trading algorithms can potentially make faster and more accurate trading decisions than humans In terms of speed and accuracy AI algorithms can analyze data and make decisions much faster than humans and can do so with a high degree of accuracy This can be particularly useful in fast moving financial markets where quick and accurate decision making can be the difference between success and failure This book highlights how AI in finance can improve efficiency reduce costs and increase the speed and accuracy of financial decision making Moreover the book also focuses on how to ensure the responsible and ethical use of AI in finance This book is a valuable resource for students scholars academicians researchers professionals executives government agencies and policymakers interested in exploring the role of artificial intelligence AI in finance Its goal is to provide a comprehensive overview of the latest research and knowledge in this area and to stimulate further inquiry and exploration **Violence**

Handbook of BRICS and Emerging Economies PB Anand, Shailaja Fennell, Flavio Comim, 2020-12-16 Ever since Jim O'Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over However the so called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes Are geopolitical tensions rising between these nations During the post COVID 19 situation the importance of bilateral and multilateral cooperation mechanisms and institutions is becoming clear This book focuses on one such emerging cooperation mechanism of BRICS but also more widely on those five countries and other similar economies As a global depression looms large global economic recovery depends on the performance of not only its largest economies but also many other important and significant economies within the so called G20 group Even prior to the COVID 19 outbreak multilateral institutions have been under considerable strain as with the relationship between the United States of America and China and risks to global economic recovery appear very real This book brings together multi disciplinary perspectives from over sixty scholars and it presents a comprehensive and deep dive into the BRICS and emerging economies and into an understanding the political economic and social contexts that can help in designing approaches for recovery and regaining the last momentum in the journey towards the Sustainable Development Goals

North-South Knowledge Networks Towards Equitable Collaboration

Between Tor Halvorsen, Jorun Nossun, 2017-02-23 Since the 1990s internationalisation has become key for institutions wishing to secure funding for higher education and research For the academic community this strategic shift has had many consequences Priorities have changed and been influenced by new ways of thinking about universities and of measuring their impact in relation to each other and to their social goals Debates are ongoing and hotly contested In this collection a mix of renowned academics and newer voices reflect on some of the realities of international research partnerships They both question and highlight the agency of academics donors and research institutions in the geopolitics of knowledge and power The contributors offer fresh insights on institutional transformation the setting of research agendas and access to research funding while highlighting the dilemmas researchers face when their institutions are vulnerable to state and donor influence Offering a range of perspectives on why academics should collaborate and what for this book will be useful to anyone interested in how scholars are adapting to the realities of international networking and how research institutions are finding innovative ways to make NorthSouth partnerships and collaborations increasingly fair sustainable and mutually beneficial

Abu Mayanja, MP A. B. K. Kasozi, 2024-02-01 This book Abu Mayanja MP The intellectual star of Uganda s Struggle for independence and the search for a liberal democratic state 1929 2005 is a biography of a brilliant African politician a history of a country and a continent told through the lens and activities of an individual politician The book breaks new ground in how Uganda and Africa have been viewed by academic and popular opinion Mayanja s life sheds light on the last days of colonialism and the early postcolonial history of Uganda and other African countries First although Africa particularly Uganda is viewed by popular imagination through the images of dictatorial and corrupt African leaders like Amin Obote Mubutu Bokassa Bongo and others there were and still are voices of reason who advocated for the advantages of good governance Secondly it shows that it is not only heads of states who influenced the political direction of postcolonial states in the period just before and after independence Other actors shaped the opinions of the masses and influenced how laws were formed and implemented Thirdly Mayanja is one of those public intellectuals who stood up to autocracy and what he thought should be done through words and actions He analysed political and social issues at a higher conceptual level than almost all his contemporaries He was indeed the intellectual star of Uganda s struggle for self rule and the nine years that followed independence His ridiculing of those in power for their failure to know or understand governance issues landed him in prison and denied him full participation in governing the Uganda postcolonial state But he left deep footprints on Uganda s and East African political thought Had his suggestions for managing postcolonial Uganda been followed the country would not have suffered as severely as it has since 1966 *Routledge Handbook of Environmental Journalism* David B. Sachsman, JoAnn Myer Valenti, 2020-05-14 The Routledge Handbook of Environmental Journalism provides a thorough understanding of environmental journalism around the world An increasing number of media platforms from newspapers and television to Internet social media networks are the major providers of indispensable information about the natural world and

environmental risk Despite the dramatic changes in the news industry that have tended to reduce the number of full time newspaper reporters environmental journalists remain key to bringing stories to light across the globe With contributions from around the world broken down into five key regions the United States of America Europe and Russia Asia and Australia Africa and the Middle East and South America this book provides support for today s environment reporters the providers of essential news in the 21st century As a scholarly and journalistic work written by academics and the environmental reporters themselves this volume is an essential text for students and scholars of environmental communication journalism and global environmental issues more generally as well as professionals working in this vital area Research Universities in Africa

Cloete, Nico,Bunting, Ian,2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa **Science by Women**
