North-South Knowledge Networks Towards Equitable Collaboration Between Tor Halvorsen, Jorun Nossun, 2017-02-23

Since the 1990s internationalisation has become key for institutions wishing to secure funding for higher education and research. For the academic community this strategic shift has had many consequences. Priorities have changed and been influenced by new ways of thinking about universities and of measuring their impact in relation to each other and to their social goals. Debates are ongoing and hotly contested. In this collection a mix of renowned academics and newer voices reflect on some of the realities of international research partnerships. They both question and highlight the agency of academics, donors and research institutions in the geopolitics of knowledge and power. The contributors offer fresh insights on institutional transformation, the setting of research agendas and access to research funding while highlighting the dilemmas researchers face when their institutions are vulnerable to state and donor influence. Offering a range of perspectives on why academics should collaborate and what for, this book will be useful to anyone interested in how scholars are adapting to the realities of international networking and how research institutions are finding innovative ways to make North-South partnerships and collaborations increasingly fair, sustainable and mutually beneficial. Area Handbook for Kenya Irving Kaplan, 1976

Strengthening Uganda's Policy Environment for Investing in University Development, 1993. In recent years Makerere University has experienced increasing student and staff unrest. The academic community is demoralized by tight government controls on spending, especially by inaction on staff salary demands. Donor support will not be forthcoming without broad policy reform in higher education rather than piecemeal reform. **Transforming**

Entrepreneurship Education Jantje Halberstadt, Antonieta Alcorta de Bronstein, Jean Greyling, Shaun Bissett, 2022-12-14. This open access book provides selected teaching approaches supporting methods, concrete examples of curricula as well as extracurricular teaching formats which are predominantly tailored to both African and German requirements. These approaches were developed by the YEEES Training and Research Centers, an international interdisciplinary network of university teachers and researchers from Germany and southern Africa, and combine the fields of management, entrepreneurship, information and communication technologies, ICT and sustainability. The book shows how current scientific results can be integrated into teaching, how students can contribute to research while learning, and how research can contribute to the development and evaluation of new formats. It is thus relevant for university teachers, researchers, students as well as practitioners who want to educate and act as future change agents. *National Accountability for International Crimes in Africa* Emma Charlene Lubaale, Ntombizozo Dyani-Mhango, 2022-02-07. This book critically examines the issues pertaining to the Rome Statute's complementarity principle. The focus lies on the primacy of African states to prosecute alleged perpetrators of international crimes in their respective jurisdictions. The chapters explore states' international and domestic obligations to hold perpetrators of international crimes to account before the national courts and demonstrate the

complexity of enforcing national accountability of alleged perpetrators of international crimes while also ensuring that post conflict African states achieve national healing reconciliation and sustainable peace The contributions reject impunity for international crimes whilst also considering these complexities Emphasis further lies on the meaning of accountability in the context of the politics of selective international criminal justice for crimes committed before the establishment of the International Criminal Court

MIMED Forum IV Beyhan Bolak Hisarligil,Gülsün Sağlamer,2014-08-11 This book is the outcome of one of the Forum Series on Architectural Education organized by the Architectural Education Association of Turkey MIMED on the theme of Flexibility in Architecture At Forum IV the architectural education platform was cross examined new ideas and experiences were shared and the potentials of regeneration were discovered The notion of flexibility in architectural education is the subject of fresh and vital debate which is based on whether it is achieved by the inner dynamics of architecture or the external dynamics However this debate seems null and void since the dynamics of both sides seem to necessitate flexibility in architectural education at almost the same level Hence the attitude that the prerequisite for creating flexibility according to the inner dynamics of architecture depends on the protection of architectural education from the coercive effects of external dynamics is no longer a relevant issue Furthermore architectural education as a role model in such a debate becomes more important not only in a monotyping global context but also in the local social context as well Herein lies a fundamental dichotomy arising from the fact that because of globalization curricula may face the risk of becoming uniform Any effort to overcome this dichotomy in such a debate seems vital Then the question arises whether such a dichotomy which turns architectural education from an autonomous discipline into a quasi autonomous one transforms architectural education into a rather political issue If the autonomous nature of architectural education resists globalization the question of the manner in which this resistance occurs and what impact it will have on architectural education seems of the utmost importance The volume begins with a preface by Gulsun Saglamer President of MIMED Contributors include Juhani Pallasmaa Kim Dovey Kojin Karatani Herman Neuckermans Conall Cath in Mark Olweny Ugur Tanyeli Ferhan Yurekli Gulsun Saglamer Fatma Erkok Rengin Unver Cigdem Polatoglu S Mujdem Vural Iris Aravot Acalya Allmer Sigrun Prahli Aslihan Senel Sevgi Turkkan Burcin Kurtuncu Sait Ali Koknar Ozlem Berber Funda Uz Sonmez Akin Sevinc Danelle Briscoe Kurt Gouwy Aydan Balamir Mine Ozkar Basak Ucar Semra Arslan Selcuk Arzu Gonenc Sorguc Sema Alacam Esra Gurbuz Urs Hirschberg and Ahu Sokmenoglu

Technologies for Human Development and Knowledge Management Rahman, Hakikur,2021-04-23 In recent decades digital technologies have permeated daily routines whether at school at work or during personal engagements Stakeholders in education are promoting innovative pedagogical practices the business sector is utilizing updated processes Even the public is improving their lifestyles by utilizing innovative technology In a knowledge construction setting technology becomes a tool to assist the user to access information communicate information and collaborate with others towards human development and knowledge management In this context ubiquitous computing has emerged to support humans in their daily life activities in a personal unattended and remote manner Ubiquitous Technologies for Human Development and Knowledge Management serves as an authoritative reference source for the latest scholarly research on the widespread incorporation of technological innovations around the globe It examines how the application of ubiquitous computing technologies affects various aspects of human lives specifically in human development and knowledge management The chapters demonstrate how these ubiquitous technologies networks and associated systems have proliferated and have woven themselves into the very framework of everyday life It covers categorized investigations ranging from e governance knowledge management ICTs public services innovation and ethics This book is essential for ICT specialists technologists teachers instructional designers practitioners researchers academicians and students interested in the latest technologies and how they are impacting human development and knowledge management across different disciplines Entrepreneurship Education and Training Programs around the World Alexandria Valerio,Brent Parton,Alicia Robb,2014-05-06 Entrepreneurship has attracted global interest for its potential to catalyze economic and social development Research suggesting that certain entrepreneurial mindsets and skills can be learned has given rise to the field of entrepreneurship education and training EET Despite the growth of EET global knowledge about these programs and their impact remains thin In response this study surveys the available literature and program evaluations to propose a Conceptual Framework for understanding the EET program landscape The study finds that EET today consists of a heterogeneous mix of programs that can be broken into two groups entrepreneurship education and entrepreneurship training These programs target a range of participants secondary and post secondary education students as well as potential and practicing entrepreneurs The outcomes measured by program

evaluations are equally diverse but generally fall under the domains of entrepreneurial mindsets and capabilities entrepreneurial status and entrepreneurial performance The dimensions of EET programs vary according the particular target group Programs targeting secondary education students focus on the development of foundational skills linked to entrepreneurship while post secondary education programs emphasize skills related to strategic business planning Programs targeting potential entrepreneurs generally are embedded within broader support programs and tend to target vulnerable populations for whom employment alternatives may be limited While programs serving practicing entrepreneurs focus on strengthening entrepreneurs knowledge skills and business practices which while unlikely to transform an enterprise in the near term may accrue benefits to entrepreneurs over time The study also offers implications for policy and program implementation emphasizing the importance of clarity about target groups and desired outcomes when making program choices and sound understanding of extent to which publicly supported programs offer a broader public good and compare favorably to policy alternatives for supporting the targeted individuals as well as the overall economic and social objectives
