International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers, researchers and education professionals with cutting edge knowledge developed in the last decades by the educational, behavioural and neurosciences, integrating cognitive, developmental and socioeconomic approaches to deal with the problems children face in learning mathematics. The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades, but the most part of this research has been conducted in non applied settings and there is still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings. Now it is time to bring the results from the laboratory to the classroom. Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments. It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues. And it does so from an international perspective, dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world. All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society.

Shaw, Nancy Staton Barbour, Patti Duncan Ph.D., Kryn Freehling-Burton Ph.D., Jane Nichols, 2018-01-04 Providing an in depth look at the lives of women and girls in approximately 150 countries, this multivolume reference set offers readers transnational and postcolonial analysis of the many issues that are critical to the success of women and girls. For millennia, women around the world have shouldered the responsibility of caring for their families. But in recent decades, women have emerged as a major part of the global workforce, balancing careers and family life. How did this change happen? And how are societies in developing countries responding and adapting to women's newer roles in society? This four volume encyclopedia examines the lives of women around the world with coverage that includes the education of girls and teens, the key roles women play in their families, careers, religions and cultures, how issues for women intersect with colonialism, transnationalism, feminism and established norms of power and control. Organized geographically, each volume presents detailed entries about the lives of women in particular countries. Additionally, each volume offers sidebars that spotlight topics related to women and girls in specific regions or focus on individual women's lives and contributions. Primary source documents include sections of countries' constitutions that are

relevant to women and girls United Nations resolutions and national resolutions regarding women and girls and religious statements and proclamations about women and girls The organization of the set enables readers to take an in depth look at individual countries as well as to make comparisons across countries
