Portable Hookup to Faucet

- All water temperature choices are made from the faucet. Turn on the hot valve for a hot wash, turn on the cold valve for a cold wash, and both for a warm wash.
- Make sure that the Cold/Cold button is pushed in at all times. The hot button is not used on portable hookups.
- The machine uses cold water for both the wash and the dry cycle. The first time the water goes in it can be any temperature desired. Once the machine fills up the water stops coming into the soap drawer. At that point turn off the hot water, and make sure that the cold water is on, and remains on for the rest of the wash and dry cycle. The only time you will ever have hot or warm water running into the machine is the initial fill up.

Directions for Portable Hook-up

- 1) Load Machine- Minimum Half way, Maximum Three Quarters.
- 2) Connect water supply to faucet, and select desired washing water temperature.
- 3) Set Wash knob at # 2.
- 4) Set Dryer at desired drying time.
- 5) Set RPM knob for desired spin cycle speed.
- 6) Push in the START/OFF button.
- 7) As water is going in, pour your soap and bleach in the middle compartment, and add fabric softener to far right compartment if desired.
- 8) Once machine is done with the initial fill-up, make sure to switch the faucet to COLD water only which remains on for the rest of the wash and dry cycle.

Permanent Hookup to Plumbing

- Choose the water temperature button that you want to use for the wash.
- The machine fills up with the water you choose, the intermediate rinses are automatically cold, and the last rinse will be whatever button is pushed in. For example, if you want to do a hot wash, but want the last rinse to be cold, wait until the first fill up is completed, then release the hot button, and push the cold button.
