

ABOUT THE MAMBA MONSTER X RS

Motor	Please note that while the Mamba Monster X RS is capable of handling incredible amounts of power, your motor must also be up for the task. Always run your motor within the manufacturer's specs. Monitor motor, battery, and controller temperatures and never let the motor get above 100°C (212°F). Excessive heat in the motor can damage the motor, the Mamba Monster X RS, and the batteries.
Gearing	Always start with stock gearing. If you wish to change the gearing, motor, or battery, check your motor temperature frequently on the first run. If the motor gets too hot, increase the spur size, or reduce the pinion size or the pack voltage.
Programming	The Mamba Monster X RS is programmable via transmitter box. Driver's Ed/Combo settings may be programmed via computer with a Castle Link USB adapter (optional; the free adapter included in package). Program with a mobile device using a Castle BtLink Bluetooth® Adapter (sold separately) or using a Castle Field Link Portable Programmer (sold separately).
Data Logging	The Mamba Monster X RS features data logging. You will be able to measure and record important power system information during your runs. Turn by Turn. After your run, you can download and analyze this log using Castle Link. You will be able to inspect many parameters including battery voltage, motor RPM, ESC temperature and more. Additional information about using the data logging feature can be found in the Driver's Ed Guide ("Data Logging").
