book addresses some of the biggest questions the discipline will face in the twenty first century How does global history differ from other interpretations of world history How do we write a global history that is not Eurocentric yet does not fall into the trap of creating new centrism How can historians compare different societies and establish compatibility across space What are the politics of global history This in depth and accessible book also explores the limits of the new paradigm and even its dangers the question of whom global history should be written for and much more Written by a leading expert in the field What Is Global History shows how by understanding the world s past as an integrated whole historians can remap the terrain of their discipline for our globalized present

*Ottoman Egypt and the Emergence of the Modern World* Nelly Hanna, 2014-09-01 Aiming to place Egypt clearly in the context of some of the major worldwide transformations of the three centuries from 1500 to 1800 Nelly Hanna questions the mainstream view that has identified the main sources of modern world history as the Reformation the expansion of Europe into America and Asia the formation of trading companies and scientific discoveries Recent scholarship has challenged this approach on account of its Eurocentric bias on both the theoretical and empirical levels Studies on India and southeast Asia for example reject the models of these regions as places without history as stagnant and in decline and as awakening only with the emergence of colonialism when they became the recipients of European culture and technology So far Egypt and the rest of the Ottoman world have been left out of these approaches Nelly Hanna fills this gap by showing that there were worldwide trends that touched Egypt India southeast Asia and Europe In all these areas for example there were linguistic shifts that brought the written language closer to the spoken word She also demonstrates that technology and know how far from being centered only in Europe flowed in different directions in the eighteenth century French entrepreneurs were trying to imitate the techniques of bleaching and dyeing of cloth that they found in Egypt and other Ottoman localities Based on a series of lectures given at the Middle East Center at Harvard this groundbreaking book will be of interest to all those looking for a different perspective on the history of south north relations

Marks, 2019-07-05 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World and upon the maturing field of environmental history constructs a story in which those parts of the world play major roles including their impacts on the environment Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world increasing inequality within the wealthiest industrialized countries and an escape from the environmental constraints of the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world the mounting environmental crisis that defines the modern world and the ways in which the forces of globalization stress the economic and political underpinnings of the modern world Now in a new edition that brings the saga of the modern world to the present in an environmental context the book considers how and why the United States emerged as a world power in the twentieth

century and became the sole superpower by the twenty first century and why the changed relationship of humans to the environment likely will be the hallmark of the modern era the Anthropocene Once again arguing that the US rise to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years A Companion Website at <https://textbooks.rowman.com/marks4e/> offers a student study guide that provides a concise summary main points key terms discussion questions map exercises and recommended websites It also offers a range of teaching materials including a test bank and a list of suggested primary and secondary readings

**Mexico, NAFTA and the Hardships of Progress** Richard Krooth, 2024-10-18 Since the 16th century Mexico has in many ways been held captive by outsiders In the modern era outsiders have most often made their impact through control of the Mexican economy and helping to establish a ruling elite while millions of ordinary citizens face abject poverty With the advent of the North American Free Trade Agreement NAFTA Mexico's leadership predicted a new wave of economic progress in the country However a devaluation of the peso showed that the Mexican economy was as problematical as before This work first examines the sociopolitical history of the country and how the events of the past continue to influence the government's policies Mexico's post NAFTA future is then explored with particular emphasis placed on how economic policy could evolve in a period of free trade A 2013 postscript concludes the work

**The Patchwork of World History in Texas High Schools** Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of

imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

**Chapters on the Theory and History of Banking** Dunbar,1891 On the Eighteenth Century as a Category of Asian History Leonard Blussé,Femme S Gaastra,2016-12-05 The starting point of this volume is the scathing attack far reaching in its consequences launched in 1942 by J C van Leur on the views then current on the character and significance of the 18th century as a category in Asian history His denial of European pre eminence in Asian waters represented a direct attack on colonial historiography The essays here derive from an international conference held 50 years later to assess the impact of van Leur s work In part historiographic in part drawing on new research they aim to delimit the boundaries of European Asian interaction and to provide case studies of what this period actually meant for the history of South and East Asia
