

Ender's Game Book Report

Ender's Game Ender's Game is a science fiction novel which was written by Orson Scott Card. This novel is about a brilliant military strategist, Ender Wiggin, whose story takes place in the future where there is a constant threat of an invasion from aliens who have been given the slanderous nickname, Bugger. Ender's childhood is not an easy one considering he gets teased at school for being a "third" only to come home to an abusive brother who is always harassing Ender and his sister Valentine and he has the weight of the world on his shoulders because they believe that he is the last hope for mankind to fight off the Buggers.

After many years of monitoring Ender the International Fleet decides they want to recruit Ender into Battle School, the story's plot takes off from here where he struggles to cope with others who despise him, he struggles with the thought of leaving his childhood, Valentine and his home and he is also in the constant struggle to dominate the Battle Room. After a few years on this spaceship Ender becomes demotivated and has to visit Earth and see Valentine where he learns about Peter's plot to take over the world.

After this Ender gets shipped off to Eros, the planet which Command School is on and where he meets Mazer Rackham, who was the hero of the first bugger invasion, and Mazer begins training Ender on a simulator that learns and gets harder as the Buggers learn from the past. Eventually Ender beats the simulator only to find out he was commanding the real thing and they didn't tell him because they wanted to keep his emotions out of it.

He also finds out that Earth has been taken over by Peter so he and Valentine colonize the bugger's old planet where he finds a bugger pupa where he then decides to try and help it. Ender was a young genius who was a third child or third in a time when having more than two children was considered bad. Because of this he was always teased but his birth was actually authorized by the government in an attempt to save the world from the Buggers.

Ender changed from innocent and trusting into a hardened and semi-emotionless machine by the end of the story. Ender's brother and sister had a very big influence on Ender, if it weren't for them being so smart the International Fleet wouldn't have authorized Ender's birth and if it weren't for Peter he wouldn't have known how to cry silently and Valentine helped him cope with Peter while also teaching him how to love and helping him when he visits Earth right before going to Command School.

The story has many settings. The first of which takes place sometime in the future somewhere on Earth where there is a constant threat of a bugger invasion and having a third child is considered bad which made life a lot harder for Ender which was one of many reasons why he left to Battle School. The setting then moves to the spaceship which Battle School is on which doesn't really need to be on a spaceship unless Orson Scott Card wanted the spaceship to help with the feeling of isolation.

As the story progresses the setting moves to the planet Eros which is where he will be

Talking to Terrorists Carolin Goerzig, 2010-06-17 This book examines the doctrine of giving no concessions to terrorists and uses empirical research to establish whether there is any link between negotiating with such groups and the spread of violence The logic of the no concessions doctrine is based on the argument that other terrorist groups multiply when they realize that terrorism succeeds in achieving political goals Proponents of the no concessions doctrine have argued that there is a pattern in terrorist contagion which results from giving in to their demands Statistical evidence for terrorist contagion is not convincing enough however as depicting an increase in terrorist incidences as a consequence of concessions could merely imply a flawed causality Without an explanation for such correlations we are left wondering whether other reasons could be decisive in the increase in terrorist actions Based on field research in four countries and interviews with current and former members of several different terrorist groups this book establishes a qualitative relationship between concessions to terrorists on the one hand and non contagion of other terrorist groups on the other The deterrence effect intended by the imperative never to concede is seriously challenged In fact it can be precisely through concessions that groups mentalities and actions are called into question The book will be of great interest to students of terrorism and political violence war and conflict studies security studies and IR politics Carolin Goerzig is a Post Doctoral Fellow at the EU Institute for Security Studies in Paris and has a PhD in Political Science from Ludwig Maximilians University of Munich
