Energy And Bulding Control Systems In The Tropics:

Energy and Bulding Control Systems in the Tropics (Penerbit USM) Sharifah Fairuz Syed Fadzil, Hugh Byrd, 2014-11 This book deals with both passive and active methods of controlling the environmental performance of buildings in hot tropical climates such as Malaysia In these climates the building fabric plays a crucial role in determining the indoor environment and maintaining reasonable thermal comfort Useful and practical examples from local case studies are used to illustrate solutions While the book is of a technical nature and based on academic research the language is suitable for both students and the general public The book offers a significant contribution towards the move to more sustainable energy efficient and green buildings It provides building designers with practical and simple solutions that are based on a sound understanding of building physics

Building Maintenance Technology in Tropical Climates Clive Briffett, 1995 The main objective of the book is to highlight the important problems in building maintenance technology broadly defined as the application of scientific principles to the care and preservation of building assets suggest how they may be overcome with special reference to tropical climates and encourage a greater participation of professionals in building maintenance work The contents cover a wide range of problems mostly derived from the experience of the writers with buildings located in Singapore and the South East Asia region These are dealt with under five general areas 1 Structure and Roof Systems 2 Finishing Systems 3 Natural Systems 4 Access Systems Building professionals property managers developers and others in the industry should find the book useful

Energy and Building Control Systems in the Tropics Sharifah Fairuz Syed Fadzil, Hugh Byrd, 2012 NBS Special Publication, 1968 **Automation, Control and Energy Efficiency in Complex Systems**

Hamid Khayyam, 2020-12-22 This book is aimed at serving researchers engineers scientists and engineering graduate and PhD students of engineering and physical science together with individuals interested in engineering and science This book focuses on the application of engineering methods to complex systems including transportation building and manufacturing with approaches representing a wide variety of disciplines of engineering and science Throughout the book great emphases are placed on engineering applications of complex systems as well as the methodologies of automation including artificial intelligence automated and intelligent control energy analysis energy modelling energy management and optimised energy efficiency The significant impact of recent studies that have been selected for presentation are of high interest in engineering complex systems An attempt has been made to expose the reading audience of engineers and researchers to a broad range of theoretical and practical topics The topics contained in the present book are of specific interest to engineers who are seeking expertise in transportation building and manufacturing technologies as well as mathematical modelling of complex systems engineering approaches to engineering complex problems automation via artificial intelligence methods automated and intelligent control and energy systems The primary audience of this book are researchers graduate students and engineers in mechanical engineering control engineering computer engineering electrical engineering and science disciplines In

particular the book can be used for training graduate and PhD students as well as senior undergraduate students to enhance their knowledge by taking a graduate or advanced undergraduate course in the areas of complex systems control systems energy systems and engineering applications The covered research topics are also of interest to engineers and academia who are seeking to expand their expertise in these areas **Publications** United States. Cotgrave,Michael Farragher,2017-08-29 The design construction and use of buildings in tropical climates pose specific challenges to built environment professionals This text seeks to capture some of the key issues of technology and practice in the areas of building design refurbishment construction and facilities management in tropical regions Using a consistent chapter structure throughout and incorporating the latest research findings this book outlines the functional requirements of buildings in tropical climates the challenges associated with the sustainability of the built environment building form and whole life performance in the context of a tropical setting the impact of potentially hostile tropical conditions upon building pathology and the durability of components structure and fabric the tasks which face those responsible for appraising the design condition maintenance and conservation of built heritage in tropical regions the facilities management issues faced in tropical climates and the refurbishment upgrade and renewal of the tropical built environment The book is ideal as a course text for students of Architecture Construction Surveying and FM as well as providing a sound reference for practitioners working in these regions Building Technology Publications Center for Building Technology,1981 **Architecture, City,**

Environment Koen Steemers,Simos Yannas,2000 PLEA is a network of individuals sharing expertise in the arts sciences planning and design of the built environment It serves as an international interdisciplinary forum to promote discourse on environmental quality in architecture and planning This 17th PLEA international conference addresses sustainable design with respect to architecture city and environment at the turn of the millennium The central aim of the conference is to explore the interrelationships and integration of architecture city and environment The Proceedings will be of interest to all those involved in bioclimatic design and the application of natural and innovative techniques to architecture and planning The conference is organised by the Martin Centre for Architectural and Urban Studies University of Cambridge and the Cambridge Programme for Industry University of Cambridge **Advances in Energy Recovery and Efficiency**

Technologies Basel I. Abed Ismail,2025-03-12 This book titled Advances in Energy Recovery and Efficiency Technologies presents and covers unique and interesting topics related to advances and innovations in energy recovery and energy efficiency technologies It is the result of contributions from a number of researchers and experts worldwide Energy recovery

and efficiency technologies and methods aim to decrease energy wasted or unutilized in various energy conversion processes ultimately reducing the required energy input fuel and improving the overall energy efficiency of systems and energy conservation of natural energy resources These technologies once efficiently designed and their performances are optimized will potentially improve the economics and sustainability of systems as well as reduce their emissions air pollution and thermal energy waste discharged to the environment It is hoped that the book will become a valuable source of information and a basis for extended research for researchers academicians policymakers and practitioners in the area of energy recovery and energy efficiency technologies

Proceedings of the 24th International Symposium on Advancement of Construction Management and Real Estate Gui Ye,Hongping Yuan,Jian Zuo,2021-06-07 This book covers various current and emerging topics in construction management and real estate Papers selected in this book cover a wide variety of topics such as new type urbanization planning and construction of smart city and eco city urban rural infrastructure development land use and development housing market and housing policy new theory and practice of construction project management big data application smart construction and BIM international construction i e belt and road project green building off site prefabrication rural rejuvenation and eco civilization and other topics related to construction management and real estate These papers provide useful references to both scholars and practitioners This book is the documentation of The 24th International Symposium on Advancement of Construction Management and Real Estate which was held in Chongqing China

Energy Recovery Technology for Building Applications Mardiana Idayu Ahmad,Saffa Riffat,2020-07-13 This book discusses energy recovery technology a green innovation that can be used in buildings This technology reduces energy consumption in buildings and provides energy savings to conventional mechanical ventilation systems Divided into eight chapters the book provides in depth technical information state of the art research and latest developments in the energy recovery technology field Case studies describe worldwide applications of energy recovery technology and its integrated system for building services This book will be used as a general and technical reference book for students engineers professionals practitioners scientists and researchers seeking to reduce energy consumption of buildings in various climatic conditions Presents an overview of energy consumption scenarios in buildings and the needs for energy efficient technologies at regional and global levels Explains models and methods of energy recovery technology performance evaluation Inspires further research into energy recovery technology for building applications

Towards a Low-energy Building Design for Tropical Malaysia Abdul Malek Abdul Rahman,2009 **Energy Research Abstracts** ,1989 **Designing for Zero Waste**

Steffen Lehmann,Robert Crocker,2013-07-03 Designing for Zero Waste is a timely topical and necessary publication Materials and resources are being depleted at an accelerating speed and rising consumption trends across the globe have placed material efficiency waste reduction and recycling at the centre of many government policy agendas giving them an unprecedented urgency While there has been a considerable literature addressing consumption and waste reduction from

different disciplinary perspectives the complex nature of the problem requires an increasing degree of interdisciplinarity Resource recovery and the optimisation of material flow can only be achieved alongside and through behaviour change to reduce the creation of material waste and wasteful consumption This book aims to develop a more robust understanding of the links between lifestyle consumption technologies and urban development

Construction and Building Automation Benny Raphael, 2022-07-26 This book is intended to be used as a textbook in undergraduate civil engineering and construction courses to introduce cutting edge mechanical electrical and computer science topics that are needed for civil and construction engineers to collaborate in inter disciplinary automation projects Part I introduces the basics of hardware and software technologies that are needed for implementing automation in buildings and construction The content begins with the fundamental concepts and uses practical examples to bring out the benefits of automation through case studies that are easy to understand No other book uniformly treats the subject of automation within the context of buildings and construction activities While the technology needed for these two application domains are similar the unifying principles are not well recognized This book will bring out the fundamental principles that could form the basis of application to these two domains For example it will become clear that sensors actuators and controllers along with smart control strategies could be used for automating tasks within buildings and on construction sites Part II of the book will introduce key advances in the areas of machine learning and artificial intelligence that are significant for the intelligent control of buildings and construction equipment Control algorithms and techniques for data analytics are explained in a form that is appropriate for non computer science students Each chapter contains several hands on exercises meant to apply the principles that are covered These include numerical problems as well as design and analysis examples This new textbook Introduces hardware and software needed for automating engineering tasks Presents examples of applications in the control of building systems Illustrates of the use of automation for improving construction processes Provides a lucid introduction to advanced computing concepts machine learning artificial intelligence and control algorithms to construction and engineering students It is sure to be essential reading for a growing number of courses in smart construction building automation robotics intelligent buildings and construction 4 0 Supplementary material including answers to exercises in the book will be provided on the author s website <https://bennyraphael.com/book2022>

Handbook of Digital Innovation, Transformation, and Sustainable Development in a Post-Pandemic Era M. Affan Badar, Ruchika Gupta, Priyank Srivastava, Imran Ali, Elizabeth A. Cudney, 2024-12-30 Businesses have faced a variety of difficulties as a result of the global pandemic and how they responded to this disruption has affected both their resilience and their ability to get through this crisis Digital technologies have played a crucial role in addressing these issues and fostering resilience It is therefore imperative to explore options for post pandemic business transformation and rethinking sustainable development Handbook of Digital Innovation Transformation and Sustainable Development in a Post Pandemic Era covers digital innovation and business transformation

to build resilience for sustainable development and growth and highlights the impact of supply chain disruptions and solutions to sustain. The handbook stands out for its inclusion of industry cases from various regions across the globe. By presenting the use of big data, blockchain technology, and Industry 4.0, the handbook conveys how to work towards sustainable development and offers self-reliant and sustainable business models. Researchers and practitioners in industrial engineering, engineering management, business management, supply chain management, and digital technologies, along with businesses, can apply the research and practices covered in the handbook. Chapters 3 and 14 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives (CC BY-NC-ND 4.0) license.
