Education Approaches to Inclusive Business Management Modarelli, Giuseppe, Rainero, Christian, Amelio, Stefano, 2024-10-07

Addressing social inequalities and fostering holistic well being has never been more pressing As people grapple with environmental challenges and navigate the complexities of human interactions the need for a paradigm shift in how businesses are managed becomes vital Seeking to confront the profound issue at the heart of our societal fabric the need for organizations both public and private to transcend conventional practices emerges Game Based Education Approaches to Inclusive Business Management as a tool for change The book advocates for a transformative approach that integrates game based learning and working methodologies to instigate a shift towards inclusivity social responsibility and overall well being Scholars academics practitioners and those passionate about reshaping our societal fabric are invited to contribute to this collective effort shaping a future where inclusivity and well being are not mere ideals but integral components of business management Grounded in the understanding that the fate of our planet hinges not only on environmental responsibility but also on the quality of human interactions within our work environments this book ventures into uncharted territory The objective is clear to dissect the challenges impeding inclusive practices in business management By melding research with game based methodologies the book seeks to uncover solutions that transcend traditional boundaries It endeavors to examine the complexities of reducing inequalities and fostering inclusivity by delving into organizational economic and personal perspectives The fusion of game based learning and game based working emerges as a driving force for promoting organizational well being challenging existing norms and paving the way for a future where inclusivity is not just an aspiration but an intrinsic aspect of business management

Climate Change Adaptation and Development John Carstensen, 2018-04-19 Climate change is real and it is man made We have put so many greenhouse gas pollutants into the atmosphere that we will see significant and long term change that we need to adapt and adjust to It is important for development practitioners to understand these impacts and the challenge of how and when to adapt to climate change There are plenty of grim presentations of what the extremes of the possible climate scenarios will throw at us over the next 100 years but not all change will be disastrous some change will be beneficial but much of the change will happen at an unprecedented rate that will require the best possible analysis and understanding of how and when we should adapt to climate change This is important for development practitioners as we invest in ensuring that poverty is reduced and eliminated and the well being of everyone is improved Many countries and communities around the world are vulnerable to the impacts of climate change but developing economies may on one hand be less resilient to the impact but could on the other hand be in a better position to make their development climate smart by making the most efficient use of their economic resources The chapters in this book shine a light on the complexity and the multi dimensional aspects of climate change adaptation They gather some of the experiences of addressing climate change impacts in a development context This book was previously published as a special issue of Development in Practice
