Eng P3 Grade 11:

Equitable School Scheduling Cheryl Hibbeln, Lori Rhodes, 2024-11-05 To understand a school's values and priorities look at its schedule. When schedules do not meet the instructional needs of students, the result is a pipeline from PreK through grade 12 that leaks students an outcome disproportionately experienced by students of color and other marginalized student groups. This practical and thoughtful guide demonstrates how school and district scheduling teams can become Architects of Equity: highly effective teams who design schedules that reflect their commitment to student achievement and social emotional wellbeing. Including strategies to shift collective mindsets around scheduling, organize and support teaching teams, and ensure fiscal responsibility in scheduling. *Equitable School Scheduling* is a vital resource for secondary school leaders committed to dismantling systemic inequities inherent in school structures. Readers will learn how to self-assess site and/or district data through a deep examination of the course of study, site schedule's transcripts, and graduation cohort outcomes. Design and implement an Equitable Core: a guaranteed set of courses that all students experience as a part of a meaningful graduation. Prioritize underestimated and historically underserved students in the planning of the schedule. *Equitable School Scheduling* helps school and district administrators use scheduling as a tool to transform the leaky pipeline to graduation into a meaningful path to post-secondary success for all students. *Software Engineering Research in System Science*

Radek Silhavy, Petr Silhavy, 2023-07-08 The latest advancements in software engineering are featured in this book, which contains the refereed proceedings of the part of the 12th Computer Science Online Conference 2023 (CSOC 2023) held online in April 2023.
