Reasonable Faith (3rd edition) William Lane Craig, 2008-06-09 Perfect as a textbook yet excellent for lay readers this updated edition builds a positive case for Christianity by applying the latest thought to core theological themes J Gresham Machen once said False ideas are the greatest obstacles to the reception of the gospel which makes apologetics that much more important Wanting to engage not just academics and pastors but Christian laypeople and seekers William Lane Craig has revised and updated key sections in this third edition of his classic text to reflect the latest work in astrophysics philosophy probability calculus the arguments for the existence of God and Reformed epistemology His approach that of positive apologetics gives careful attention to crucial questions and concerns including the relationship of faith and reason the existence of God the problems of historical knowledge and miracles the personal claims of Christ and the historicity of the resurrection of Jesus He shows that there is good reason to think Christianity is true As Craig says If you have a sound and persuasive case for Christianity you don't have to become an expert in comparative religions and Christian cults A positive justification of the Christian faith automatically overwhelms all competing world views lacking an equally strong case

when hunter gatherers had to decide when to hunt and what to gather Making choices is what humans do But individuals feel more personal autonomy and power to choose today than ever before in human history In *Choosing Change* author Peter Coutts acknowledges that clergy today recognize the impact our individualistic culture of choice is having on congregations But Coutts also points out that many leaders do not think about motivation For them encouraging change is about selling their congregation on a new idea governed by the assumption that a better idea should win the day Wide experience in the church demonstrates that this approach often doesn't work and leaves many congregational leaders demoralized Leaders see the need for change in their congregation and they earnestly want to help their congregation to change But the approach to leadership they learned which perhaps worked better in days gone by is no longer working Leaders are in the motivation business argues Coutts *Choosing Change* provides an overview of current thinking from the field of motivation psychology In the first half of the book Coutts explores theories ideas and terms that are most pertinent for leaders who desire to encourage congregational change The second half of the book offers detailed guidance for congregational leaders who want to be motivational leaders

Persuasion and Compulsion in Democracy Jacquelyn Kegley, Krzysztof Piotr Skowronski, 2013-01-25 This collection of essays focuses on the roles that coercion and persuasion should play in contemporary democratic political systems or societies A number of the authors advocate new approaches to this question offering various critiques of the dominant classical liberalism views of political justification freedom tolerance and the political subject A major concern is with the conversational character of democracy Given the problematic and ambiguous status of the many differences present in contemporary society the authors seek to alert us to the danger that an emphasis on reasonable consensus will conceal exclusion in practice of some contending positions The voices of vulnerable peoples can be unconsciously or even deliberately silenced by various institutional processes and operating procedures and a strong media influence can change the tenor of conversations and even lead to deception To counter these factors a number of the essays in differing ways urge the fostering of local community conversations or democratic agoras so that democratic debate and conversation might maintain the vitality necessary to a strong democratic system

Impasse Roy Scranton, 2025-08-05 A Next Big Idea Club Must Read for August 2025 We need a new realism in the face of global climate catastrophe Extreme heat fires floods and storms are transforming our

planet Yet instead of serious responses from world leaders we get increasing emissions divisive politics and ersatz solutions that offer more of the same more capitalism more complexity more progress The impasse we face is not only political and institutional but cognitive existential and narrative We re incapable of grasping the scale speed and impact of global warming Our brains can t make sense of how radically our world is changing And we optimistically cling to a civilizational narrative that promises a better tomorrow if we just keep doing what we re doing It s well past time Roy Scranton argues to free ourselves from our dangerous and dogmatic faith in progress Such unwarranted optimism will only accelerate our collective disintegration If we want to have any hope at all for the future it must be grounded in a recognition of human limits a view Scranton calls ethical pessimism Drawing from psychology philosophy history and politics as well as film literature and personal experience Scranton describes the challenges we face in making sense of our predicament from problems in communication to questions of justice from the inherent biases in human perception to the difficulties of empirical knowledge What emerges is a challenging but ultimately hopeful proposition if we have the courage to accept our limits we may find a way to embrace our unknowable future
