Global Environmental Biotechnology D.L. Wise, 2013-06-29 Environmental Biotechnology is an emerging field of scientific and technological investigations that is truly global People around the world are now joined together by a common technical bond Furthermore popular recognition is high for the environmental problems being faced and solved by biotechnology methods With a feeling of winning but recognizing there is much work to be done workers with in depth experience in solving one problem in environmental biotechnology meet to learn from the background of other workers how they too are addressing and solving environmental problems This text includes papers from the third biennial meeting of the International

Society for Environmental Biotechnology the ISEB held in Boston Massachusetts on the campus of Northeastern University Technical oral presentations of state of the art research were integrated with tutorials and workshops by practising technologists in the broad field of environmental biotechnology This meeting was in every respect truly global For example presentations were heard from technical workers in Southeast Asia Russia China Europe North Africa India and the United States By having these selected presenters all participants benefited from this interactive symposium Various persons of political stature were the keynote banquet and luncheon speakers these social events further promoted informal exchange of ideas discussions of technical problems and exploration of new applications This international symposium on environmental biotechnology was held on the campus of Northeastern University but all Boston area universities were included and participated as conference Co Chairs This symposium was considered a success because workers with experience in one area of environmental biotechnology learned from the wealth of established backgrounds of those in other areas of environmental biotechnology To formally disseminate conference results all technical presentations were reviewed for formal publication
